### TECHNICAL EXPLANATION OF THE CHANGE

**Issue** Water Diverting System Change

#### Explanation

This modification should be used in case of persistent water diverting problems. Before the service activity, possible wrong usage by consumer, adjustment defects, position of the movement transmission wire assembly and the form of the cam follower should be checked. 2801000100 stock numbered old movement transmission wire has been replaced by the new 28090100100 stock numbered movement transmission wire. If either of detergent box or movement transmission wire have to be replaced in any case of water diverting failure, the other part has to be replaced free of charge.

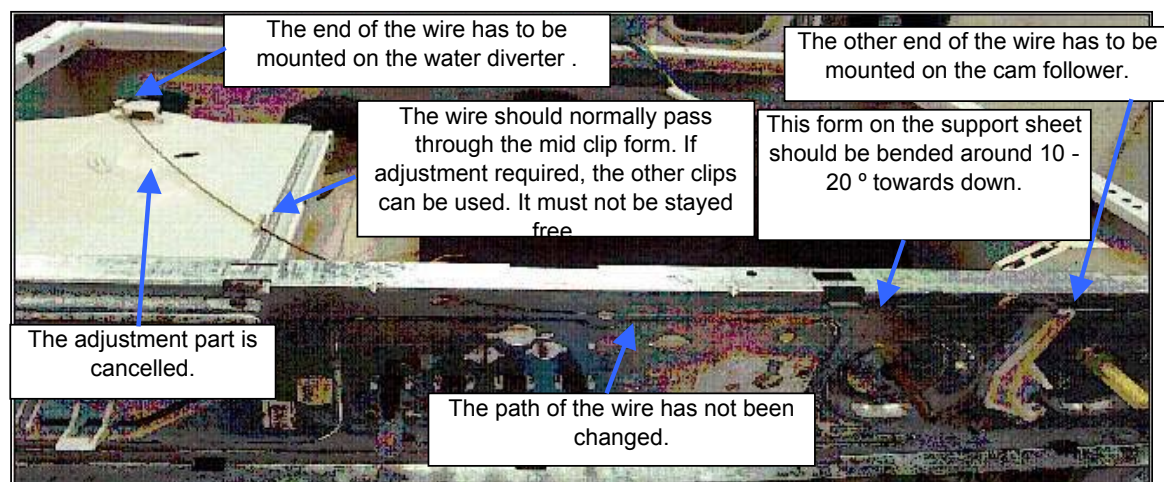

#### How to mount new movement transmission wire:

The path of the new wire is the same as the older one.

The wire has to be fixed at the middle clip on the detergent box cover.

If there is a failure of water diverting, wire has to be fixed to the other clip. Choosing which clip is appropriate depends on the tightness of the wire. The wire must not be fixed out of any clips.

In any case, if one of the clips is broken, detergent box has to be replaced.

### INFORMATION ABOUT THE PART CHANGES

Ref	New part(s)			Old Part(s)			Code
	Part name	Stock number	Rev	Part name	Stock number	Rev	
110	Movement transmission wire assembly.	28 0901 01 00	C	Movement transmission wire assembly.	28 0100 01 00	F	B1

#### CODE EXPLANATION :

**A** - Old stocks can be used; Old & new parts are fully interchangeable

**B** - Old stocks can be used; Old parts are interchangeable with old productions & new parts are interchangeable with productions

**D** - Old stocks can not be used. New parts are interchangeable with new productions

**1** - Performance / **2** - Production improvement / **3** - Safety / **4** - Material or dimension change / **5** - Additional part / **6** - Part cancellation / **7** - Alternative use
