1 Before Repair and Adjustment

Disconnect AC power, discharge Power Supply Capacitors C531~C534, C588~C589, C598~C599 and C954 through a 10Ω, 5W resistor to ground.

DO NOT SHORT-CIRCUIT DIRECTLY (with a screwdriver blade, for instance), as this may destroy solid state devices.

After repairs are completed, restore power gradually using a variac, to avoid overcurrent.

Current consumption at AC 230~240 V, 50 Hz in NO SIGNAL should be ~770mA (at volume min, in CD mode).

2 Protection Circuitry

The protection circuitry may have operated if either of the following conditions are noticed:

- No sound is heard when the power is turned on.

- Sound stops during a performance.

The function of this circuitry is to prevent circuitry damage if, for example, the positive and negative speaker connection wires are “shorted”, or if speaker systems with an impedance less than the indicated rated impedance of the amplifier are used.

If this occurs, follow the procedure outlines below:

1. Turn off the power.
2. Determine the cause of the problem and correct it.
3. Turn on the power once again after one minute.

Note :

When the protection circuitry functions, the unit will not operate unless the power is first turned off and then on again.

3 Safety Precautions

3.1. General Guidelines

1. When servicing, observe the original lead dress. If a short circuit is found, replace all parts which have been overheated or damaged by the short circuit.
2. After servicing, see to it that all the protective devices such as insulation barriers, insulation papers shields are properly installed.
3. After servicing, make the following leakage current checks to prevent the customer from being exposed to shock hazards.

3.1.1. Leakage Current Cold Check

1. Unplug the AC cord and connect a jumper between the two prongs on the plug.
2. Measure the resistance value, with an ohmmeter, between the jumpered AC plug and each exposed metallic cabinet part on the equipment such as screwheads, connectors, control shafts, etc. When the exposed metallic part has a return path to the chassis, the reading should be between $1M\Omega$ and $5.2M\Omega$.

When the exposed metal does not have a return path to the chassis, the reading must be ∞.

Figure 1

3.1.2. Leakage Current Hot Check (See Figure 1)

1. Plug the AC cord directly into the AC outlet. Do not use an isolation transformer for this check.
2. Connect a 1.5kΩ, 10 watts resistor, in parallel with a 0.15µF capacitor, between each exposed metallic part on the set and a good earth ground such as a water pipe, as shown in Figure 1.
3. Use an AC voltmeter, with 1000 ohms/volt or more sensitivity, to measure the potential across the resistor.
4. Check each exposed metallic part, and measure the voltage at each point.
5. Reverse the AC plug in the AC outlet and repeat each of the above measurements.
6. The potential at any point should not exceed 0.75 volts RMS. A leakage current tester (Simpson Model 229 or equivalent) may be used to make the hot checks, leakage current must not exceed 1/2 milliamp. In case a measurement is out of the limits specified, there is a possibility of a shock hazard, and the equipment should be repaired and rechecked before it is returned to the customer.

4 Prevention of Electro Static Discharge (ESD) to Electrostatically Sensitive (ES) Devices

Some semiconductor (solid state) devices can be damaged easily by electricity. Such components commonly are called Electrostatically Sensitive (ES) Devices. Examples of typical ES devices are integrated circuits and some field-effect transistors and

semiconductor “chip” components. The following techniques should be used to help reduce the incidence of component damage caused by electro static discharge (ESD).

1. Immediately before handling any semiconductor component or semiconductor-equipped assembly, drain off any ESD on your body by touching a known earth ground. Alternatively, obtain and wear a commercially available discharging ESD wrist strap, which should be removed for potential shock reasons prior to applying power to the unit under test.
2. After removing an electrical assembly equipped with ES devices, place the assembly on a conductive surface such as aluminium foil, to prevent electrostatic charge build up or exposure of the assembly.
3. Use only a grounded-tip soldering iron to solder or unsolder ES devices.
4. Use only an anti-static solder remover device. Some solder removal devices not classified as “anti-static (ESD protected)” can generate electrical charge to damage ES devices.
5. Do not use freon-propelled chemicals. These can generate electrical charges sufficient to damage ES devices.
6. Do not remove a replacement ES device from its protective package until immediately before you are ready to install it. (Most replacement ES devices are packaged with leads electrically shorted together by conductive foam, aluminium foil or comparable conductive material).
7. Immediately before removing the protective material from the leads of a replacement ES device, touch the protective material to the chassis or circuit assembly into which the device will be installed.

Caution

Be sure no power is applied to the chassis or circuit, and observe all other safety precautions.

8. Minimize body motions when handling unpackaged replacement ES devices. (Otherwise harmless motion such as the brushing together of your clothes fabric or the lifting of your foot from a carpeted floor can generate static electricity (ESD) sufficient to damage an ES device).

IMPORTANT SAFETY NOTICE

There are special components used in this equipment which are important for safety. These parts are marked by Δ in the schematic diagrams, Exploded Views and replacement parts list. It is essential that these critical parts should be replaced with manufacturer's specified parts to prevent shock, fire, or other hazards. Do not modify the original design without permission of manufacturer.

5 Handling the Lead-free Solder

5.1. About lead free solder (PbF)

Distinction of PbF P.C.B.:

P.C.B.s (manufactured) using lead free solder will have a PbF stamp on the P.C.B.

Caution:

- Pb free solder has a higher melting point than standard solder; Typically the melting point is 50 - 70°F (30 - 40°C) higher. Please use a high temperature soldering iron. In case of soldering iron with temperature control, please set it to 700 ± 20°F (370 ± 10°C).
- Pb free solder will tend to splash when heated too high (about 1100°F/600°C).
- When soldering or unsoldering, please completely remove all of the solder on the pins or solder area, and be sure to heat the soldering points with the Pb free solder until it melts enough.

6 Cautions to be taken when handling Optical Pickup

The laser diode used inside optical pickup could be destroyed due to static electricity as a potential difference is caused by electrostatic load discharged from clothes or human body. Handling the parts carefully to avoid electrostatic destruction during repair.

6.1. Handling Optical Pickup

1. Do not impact on optical pickup as the unit structurally uses an extremely precise technology.
2. Short-circuit the flexible cable of optical pickup remove from the circuit board using a short-circuit pin or clip in order to prevent laser diode from electrostatic destruction (Refer to Fig. 6.1 and Fig. 6.2)
3. Do not handle flexible cables forcibly as this may cause snapping. Handle the parts carefully (Refer to Fig. 6.1)
4. A new optical pickup is equipped with an anti-static flexible cable. After replacing and connecting to the flexible board, cut the anti-static flexible cable. (Refer to Fig. 6.1)

Fig. 6.1

6.2. Replacing Precautions for Optical Pickup Unit

DVD/CD Optical Pickup

The optical pickup by which part supply was carried out attaches the short clip to the flexible board for laser diode electrostatic discharge damage prevention. Please remove the short clip and be sure to check that the short land is open, before connecting. (Please remove solder, when the short land short-circuits.)

6.3. Grounding for Preventing Electrostatic Destruction

1. Human body grounding
 - Use the anti-static wrist strap to discharge the static electricity accumulated in your body. (Refer to Fig. 6.2)
2. Work place grounding
 - Place a conductive material (conductive sheet) or ironboard where optical pickup is placed. (Refer to Fig. 6.2)

Note :

Keep your clothes away from optical pickup as wrist strap does not release the static electricity charged in clothes.

Fig. 6.2

7 Precaution of Laser Diode

Caution :

This product utilizes a laser diode with the unit turned "ON", invisible laser radiation is emitted from the pick up lens.

Wavelength : 780 nm(CD)/658 nm(DVD)

Maximum output radiation power from pick up : 100 μ W/VDE

Laser radiation from pick up unit is safety level, but be sure the followings:

1. Do not disassemble the optical pick up unit, since radiation from exposed laser diode is dangerous.
2. Do not adjust the variable resistor on the pick up unit. It was already adjusted.
3. Do not look at the focus lens using optical instruments.
4. Recommend not to look at pick up lens for a long time.

CAUTION!

THIS PRODUCT UTILIZES A LASER.

USE OF CONTROLS OR ADJUSTMENTS OR PERFORMANCE OF PROCEDURES OTHER THAN THOSE SPECIFIED HEREIN MAY RESULT IN HAZARDOUS RADIATION EXPOSURE.

n Use of Caution Labels

CAUTION	- LASER RADIATION WHEN OPEN. DO NOT STARE INTO BEAM.	FDA 21 CFR / Class II
CAUTION	- VISIBLE AND INVISIBLE LASER RADIATION WHEN OPEN. AVOID EXPOSURE TO BEAM.	IEC60825-1 / Class 3b
VARNING	- SYNLIIG OCH OSYNLIIG LASERSTRÅLNING NÄR DENNA DEL ÄR ÖPPNAD. BETRÄKTA EJ STRÅLEN.	
ADVARSEL	- SYNLIIG OG USYNLIIG LASERSTRÅLING VED ÅBNING. UNNGÅ UDSÆTTELSE FOR STRÅLING.	
ADVARSEL	- SYNLIIG OG USYNLIIG LASERSTRÅLING NÄR DEKSEL ÄPNES. UNNGÅ EKSPONERING FÖR STRÅLEN.	
VARO!	- AVATTAESSA OLET ALTTI INA NÄKYVÄÄ JA NÄKYMÄTÖN LASERSÄTEILYLLE. ÄLÄ KATSO SÄTEESEEN.	
VORSICHT	- SICHTBARE UND UNSICHTBARE LASERSTRAHLUNG, WENN ABDECKUNG GEÖFFNET. NICHT DEM STRAHL AUSSETZEN.

9 Operation Procedures

Control reference guide

Main unit

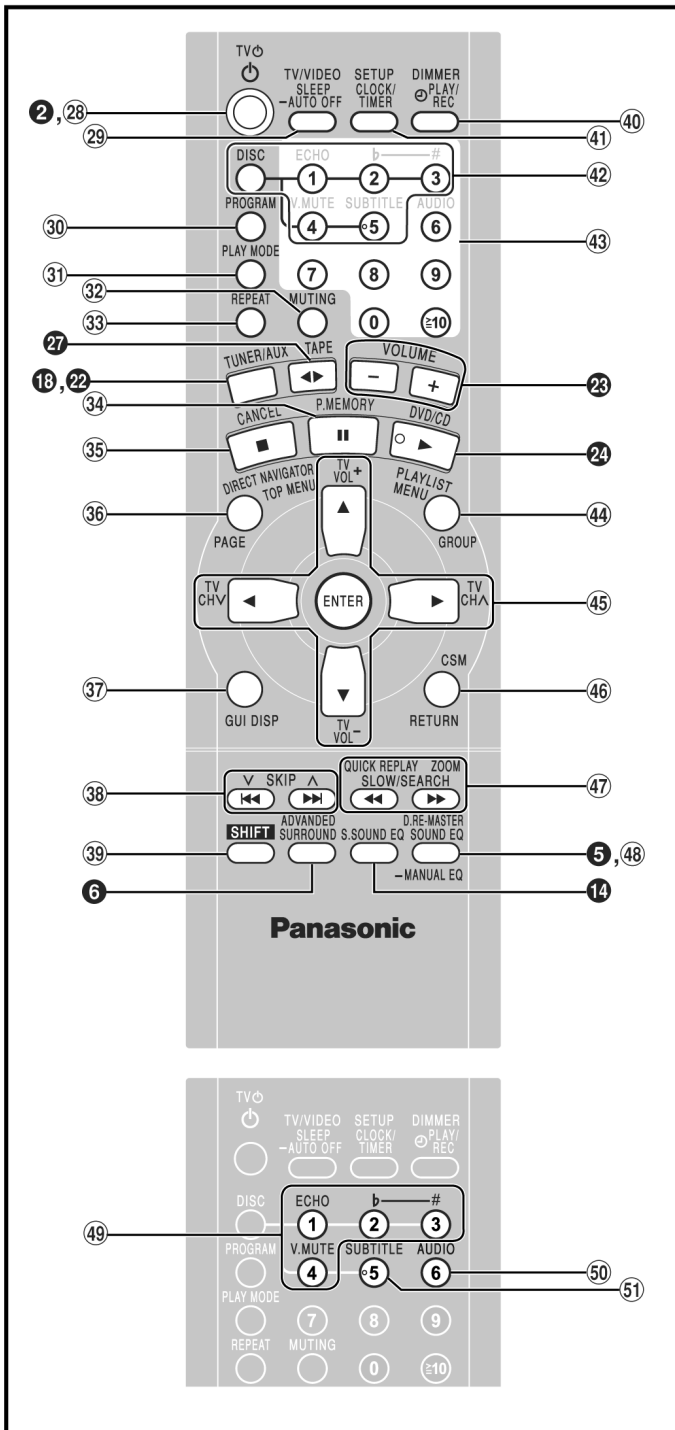

- ① **AC supply indicator [AC IN]**
This indicator lights when the unit is connected to the AC mains supply.
- ② **Standby/on switch [⏻/⏻]**
Press to switch the unit from on to standby mode or vice versa. In standby mode, the unit is still consuming a small amount of power.
- ③ **Display**
- ④ **Remote control signal sensor**
- ⑤ **Double re-master button [DOUBLE RE-MASTER]**
- ⑥ **Advanced surround button [ADVANCED SURROUND]**
- ⑦ **Deck 1/2 selection button [DECK 1/2]**
- ⑧ **Record button [● REC]**
- ⑨ **Microphone volume control [MIC VOL MIN, MAX]
Microphone jacks [MIC 1, 2]**
- ⑩ **Deck 1 cassette holder**
- ⑪ **Disc tray**
- ⑫ **Disc tray open/close button [▲ OPEN/CLOSE]**
- ⑬ **Disc direct play buttons [1]–[5]**
- ⑭ **Super sound EQ button [SUPER SOUND EQ]**
- ⑮ **Sound EQ button [SOUND EQ]**
- ⑯ **Headphones jack [PHONES]**
- ⑰ **Deck 2 cassette holder**

Center console

- ⑱ **Tuner/band select button [TUNER, BAND]**
- ⑲ **Disc skip/search/slow-motion play, tape fast-forward/rewind, tune/preset channel select, time adjust buttons [◀◀/REW/∨, ∧/FF/▶▶]**
- ⑳ **Display, demonstration button [DISPLAY, -DEMO]**
- ㉑ **Deck 1 open button [▲ DECK 1]**
- ㉒ **AUX button [AUX]**
- ㉓ **Volume control [VOLUME DOWN, UP]**
- ㉔ **DVD/CD play/pause button [▶/|| DVD/CD]**
- ㉕ **Stop button [■ STOP]**
- ㉖ **Deck 2 open button [▲ DECK 2]**
- ㉗ **Tape play/direction button [◀▶ TAPE]**

Remote control

Buttons such as 2 function in exactly the same way as the buttons on the main unit.

- 28 Standby/on, TV standby/on switch [⏻, TV ⏻]
- 29 Sleep timer, Auto off, TV/Video input mode select button [SLEEP, -AUTO OFF, TV/VIDEO]
- 30 Program button [PROGRAM]
- 31 Play mode select button [PLAY MODE]
- 32 Muting button [MUTING]
- 33 Repeat button [REPEAT]
- 34 Pause, Position memory button [⏸, P. MEMORY]
- 35 Stop, Cancel button [■, CANCEL]
- 36 Top menu, Direct navigator, Page button [TOP MENU, DIRECT NAVIGATOR, PAGE]
- 37 GUI display button [GUI DISP]
- 38 Disc skip, tape fast-forward/rewind, preset channel select, time adjust buttons [⏪, ⏩, ∇ SKIP ∆]
- 39 Shift button [SHIFT]
To use functions labeled in orange:
While pressing [SHIFT], press the corresponding button.
- 40 Play timer/record timer, Dimmer button [⌚PLAY/REC, DIMMER]
- 41 Clock/timer, Setup button [CLOCK/TIMER, SETUP]
- 42 Disc select button [DISC], Disc button [1] – [5]
- 43 Numbered buttons [0 – 9, ≥10]
- 44 Menu, Playlist, Group button [MENU, PLAYLIST, GROUP]
- 45 Cursor buttons [▲, ▼, ◀, ▶], Enter button [ENTER]
These buttons have the following functions.
[▲, ▼] : TV volume buttons [TV VOL +, -]
[◀, ▶] : TV channel select buttons [TV CH ∇, ∆]
- 46 Return, Custom sound memory button [RETURN, CSM]
- 47 Slow/search, Tuning buttons [◀◀, ▶▶ SLOW/SEARCH]
These buttons have the following functions.
[◀◀] : Quick replay button [QUICK REPLAY]
[▶▶] : Zoom button [ZOOM]
- 48 Sound EQ, Manual EQ button [SOUND EQ, -MANUAL EQ]
- 49 Echo button [ECHO]
Key control buttons [b, #]
Vocal mute button [V. MUTE]
- 50 Audio button [AUDIO]
- 51 Subtitle button [SUBTITLE]

10 Disc information

Discs that can be played

DVD-RAM	DVD-Audio	DVD-Video	DVD-R	SVCD	Video CD	CD	CD-R/RW
 Shown as "DVD-VR" on the display				 Conforming to IEC62107		 	—
RAM	DVD-A	DVD-V		VCD		CD	WMA MP3 JPEG

Use discs with the above logos and that conform to specifications. The unit cannot play other discs correctly. Do not use irregularly shaped discs (e.g. heart-shaped), as these can damage the unit.

It may not be possible to play CD-R, CD-RW, DVD-R and DVD-RAM in all cases due to the type of disc or condition of the recording.

Discs that cannot be played

DVD-ROM, CD-ROM, CDV, CD-G, +RW, DVD-RW, CVD, SACD, Divx Video Discs, Photo CD, DVD-RAM that cannot be removed from their cartridge, 2.6-GB and 5.2-GB DVD-RAM, and "Chaoji VCD" available on the market including CVD, DVCD and SVCD that do not conform to IEC62107.

Region number

The player plays DVD-Video marked with labels containing the region number or "ALL".

Region	Number	Example
U.S.A. and Canada	1	  
Asia	3	  
Australia and N.Z.	4	  

Built-in decoders

This unit has Dolby Digital and DTS decoders so you can enjoy these systems in stereo without connecting a separate decoder.

Video systems

Units for Asia, Australia and N.Z.:

- This unit can play PAL and NTSC, but your television must match the system used on the disc.
- PAL discs cannot be correctly viewed on an NTSC television.
- This unit can convert NTSC signals to PAL 60 for viewing on a PAL television (→ page 18, Video—NTSC Disc Output).
- Output is interlace (576i) when playing PAL discs.

Units for the U.S.A. and Canada:

NTSC is used. This unit converts still pictures on PAL system DVD-Audio discs for play on NTSC video systems. The picture is compressed to show it in its entirety, but this may cause it to be stretched vertically.

Playing DVDs and Video CDs

The producer of these discs can control how they are played so you may not always be able to control play as described in these operating instructions (for example if the play time is not displayed or if a Video CD has menus). Read the disc's instructions carefully.

DVD-RAM discs

The DVD-RAM you can play on this unit are those recorded with DVD video recorders, DVD video cameras, personal computers, etc. using Version 1.1 of the Video Recording Format (a unified video recording standard).

- Remove discs from their cartridges before use and return them when you are finished, making sure that the labels of the disc and cartridge face the same way.
- Some parts of the disc, for example where one program ends and another begins, may not play smoothly.

DVD-R discs

Panasonic DVD-R recorded and finalized on a Panasonic DVD video recorder or DVD video camera are played as DVD-Video on this unit.

CD-R and CD-RW discs

This unit can play CD-R/RW (audio recording disc) recorded with CD-DA, video CD, SVCD (conforming to IEC62107), WMA, MP3, or JPEG. Close the session or finalize after recording.

See page 11 for more information about WMA, MP3, and JPEG.

HighMAT discs

This unit is compatible with HighMAT discs containing WMA, MP3, and/or JPEG files.

Disc structure

Disc structure and the labels given to the items on discs depend on the disc type.

Track: the smallest division on DVD-Audio, CDs, and Video CDs, or a single WMA/MP3 file.

Chapter: the smallest division on DVD-Video.

Group: collections of tracks on DVD-Audio and equivalent to folders or albums on data discs.

Title: the largest division on DVD-Video, usually an entire movie.

Program: the division on DVD-RAM equivalent to a single recording.

Picture: a single JPEG file.

Play list: the largest grouping on a HighMAT disc, or a group of scenes on DVD-RAM.

Scene: DVD-RAM program sections specified and grouped into play lists on a DVD video recorder.

Content: covers tracks and pictures on HighMAT discs.

To clean discs

DVD-Audio, DVD-Video, Video CD, CD

Wipe with a damp cloth and then wipe dry.

DVD-RAM, DVD-R

- Clean only with an optional DVD-RAM/PD disc cleaner (LF-K200DCA1, where available).
- Never use cloths or cleaners for CDs etc.

Handling precautions

- Do not write on the label side with a ball-point pen or other writing instrument.
- Do not use record cleaning sprays, benzene, thinner, static electricity prevention liquids or any other solvent.
- Do not attach labels or stickers to discs. (Do not use discs with exposed adhesive from tape or left over peeled-off stickers.)
- Do not use scratch-proof protectors or covers.
- Do not use discs printed with label printers available on the market.

Decoder

A decoder restores the coded audio signals on DVDs to normal. This is called decoding.

Dolby Digital

This is a method of coding digital signals developed by Dolby Laboratories. Apart from stereo (2-channel) audio, these signals can also be multi-channel audio. A large amount of audio information can be recorded on one disc using this method.

DTS (Digital Theater Systems)

This surround system is used in many movie theaters around the world. There is good separation between the channels, so realistic sound effects are possible.

Dynamic range

Dynamic range is the difference between the lowest level of sound that can be heard above the noise of the equipment and the highest level of sound before distortion occurs.

Film and video

DVD-Videos are recorded using either film or video. Usually, film is recorded at 24 frames per second, the rate movies are filmed at, while video is recorded at 30 frames per second.

Frame still and field still

Frames are the still pictures that go together to make a moving picture. There are about 30 frames shown each second. One frame is made up of two fields. A regular television shows these fields one after the other to create frames.

A still is shown when you pause a moving picture. A frame still is made up of two alternating fields, so the picture may appear blurred, but overall quality is high.

A field still is not blurred, but it has only half the information of a frame still so picture quality is lower.

Interlace and progressive output

NTSC, the video signal standard, has 480 interlaced (I) scan lines, whereas progressive scanning uses twice the number of scan lines. This is called 480P. The video signals output from this unit's COMPONENT VIDEO OUT terminals (Y, P_B, P_R) allow you to enjoy higher quality pictures than if the signals were output from the VIDEO OUT terminal or S-VIDEO OUT terminal.

I/P/B

MPEG 2, the video compression standard adopted for use with DVD-Video, codes frames using these 3 picture types.

I: Intra coded picture

This picture has the best quality and is the best to use when adjusting the picture.

P: Predictive coded picture

This picture is calculated based on past I or P-pictures.

B: Bidirectionally-predictive coded picture

This picture is calculated by comparing past and future I and P-pictures so it has the lowest volume of information.

Linear PCM (pulse code modulation)

These are uncompressed digital signals, similar to those found on CDs.

Playback control (PBC)

If a Video CD has playback control, you can select scenes and information with menus.

WMA, MP3, CD text and JPEG information

- Discs must conform to ISO9660 level 1 or 2 (except for extended formats).
- This unit is compatible with multi-session but if there are a lot of sessions it takes more time for play to start. Keep the number of sessions to a minimum to avoid this.
- The order tracks appear in the menus may differ to the order shown on your computer.

WMA

- Noise may occur when playing WMA files.
- You cannot play WMA files that are copy protected.

MP3

- This unit is not compatible with ID3 tags.
- If you play an MP3 track that includes still picture data, it will take some time before the music itself starts playing and the elapsed time will not be displayed during this time. Even after the track starts, the correct play time will not be displayed.

JPEG

- To view JPEG files on this unit:
 - Take them on a digital camera that meets the DCF (Design rule for Camera File System) standard. Some digital cameras have functions that are not supported by the DCF standard like automatic picture rotation which may render a picture unviewable.
 - Do not alter the files in any way or save them under a different name.
- This unit cannot display moving pictures, Motion JPEG and other such formats, still pictures other than JPEG (i.e. TIFF) or play associated sound.

Order of play

WMA MP3 JPEG

Naming folders and files

Prefix folder and file names with 3-digit numbers in the order you want to play them.

Extension
004track.wma (or .WMA)

The extension for MP3 is ".mp3" or ".MP3".

The extension for JPEG is ".JPG", ".jpg", ".JPEG" or ".jpeg".

CD (CD text only)

When making your own CD text discs

The unit plays the tracks in the order you record them so you do not have to prefix the titles with numbers.

Windows Media, and the Windows logo are trademarks, or registered trademarks of Microsoft Corporation in the United States and/or other countries.

WMA is a compression format developed by Microsoft Corporation. It achieves the same sound quality as MP3 with a file size that is smaller than that of MP3.

MPEG Layer-3 audio decoding technology licensed from Fraunhofer IIS and Thomson multimedia.

11 About HighMAT

11.1. What is HighMAT?

This word combines the abbreviations of Matsushita Electric Industrial Co. Ltd. and High Performance Media Access Technology, and is a trademark of Microsoft Corporation. The products with the HighMAT logo shown below are made according to the HighMAT standard.

HighMAT is a format that allows users to save digital contents such as photographs, audio, and images on a CD. This gives consistency in the way of reading data when general consumer products (such as DVD players) and PCs are used, and thus, it is easy to operate for the user.

11.2. Why use HighMAT?

Up to now, there was no harmonized standard from playing digital content stored in CD-ROM formats (including CD-R) on consumer products like DVD players. Therefore, we used to have problems such as follow:

- There was no common play list or attached information on contents, which is called metadata.
- The data compression method differed according to the equipment.
- As the number of CD-ROMs recorded increased retrieved the contents became more difficult.
- Because display and operation methods were different depending on the equipment, the play order of the content on the same disc could change.

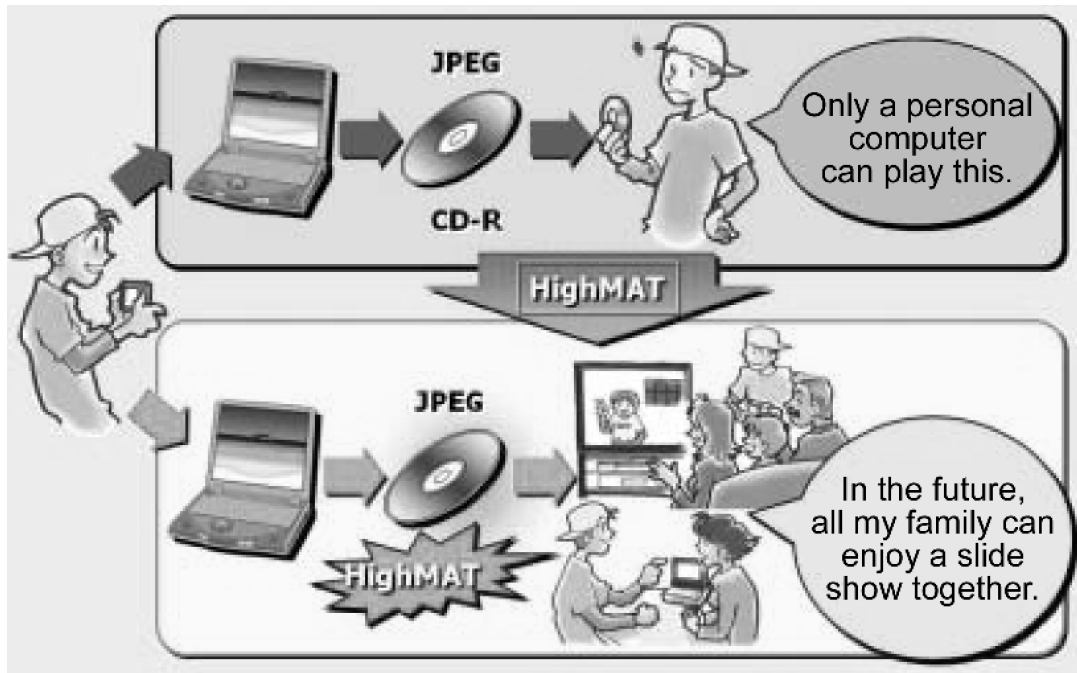

11.3. The advantages of using HighMAT

Applying the HighMAT standard will solve the following problems and will improve usability.

- It will create a common user interface for both PC and consumer products.

- Regardless of the types of consumer products, such as DVD players, portable CD players, car stereos, and micro computers, a consistent way to pay for digital content will be created and it will make it easier to retrieve data.

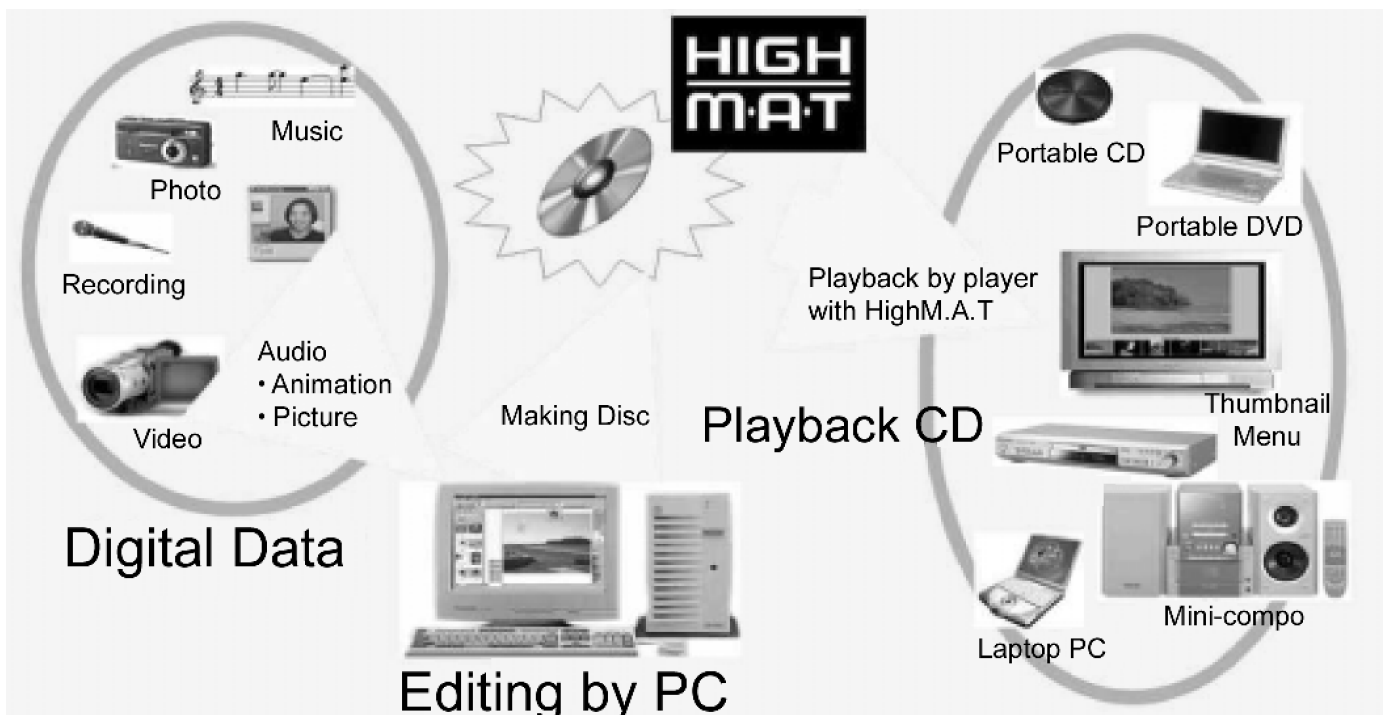

- You can also play digital content on the disc, which was created in accordance with the HighMAT format with a conventional CD-ROM player.

11.4. Outline of the HighMAT standard

1. Recording medium

- CD-R/CD-RW
- Supports ISO 9660 Level Expanded Joliet
- For multiple session

2. Support data format

- Level 1 player: WMA, MP3 (MPEG-1 Audio Layer 3)
- Level 2 player: WMA, MP3 (MPEG-1 Audio Layer 3), JPEG
- Level 3 player: WMA, MP3 (MPEG-1 Audio Layer 3), JPEG, WMV, MPEG4 (optional)

3. Limitation of data format

- WMA, MP3 (MPEG-1 Audio Layer 3) 64 kbps - 160.999 kbps, 44.1 KHz, stereo, fixed bit rate/ variable bit rate.
- WMA, V2 and above, excluding Lossless/Voice/Pro
- JPEG: Max 6M pixel, Maximum file size: 3 MB

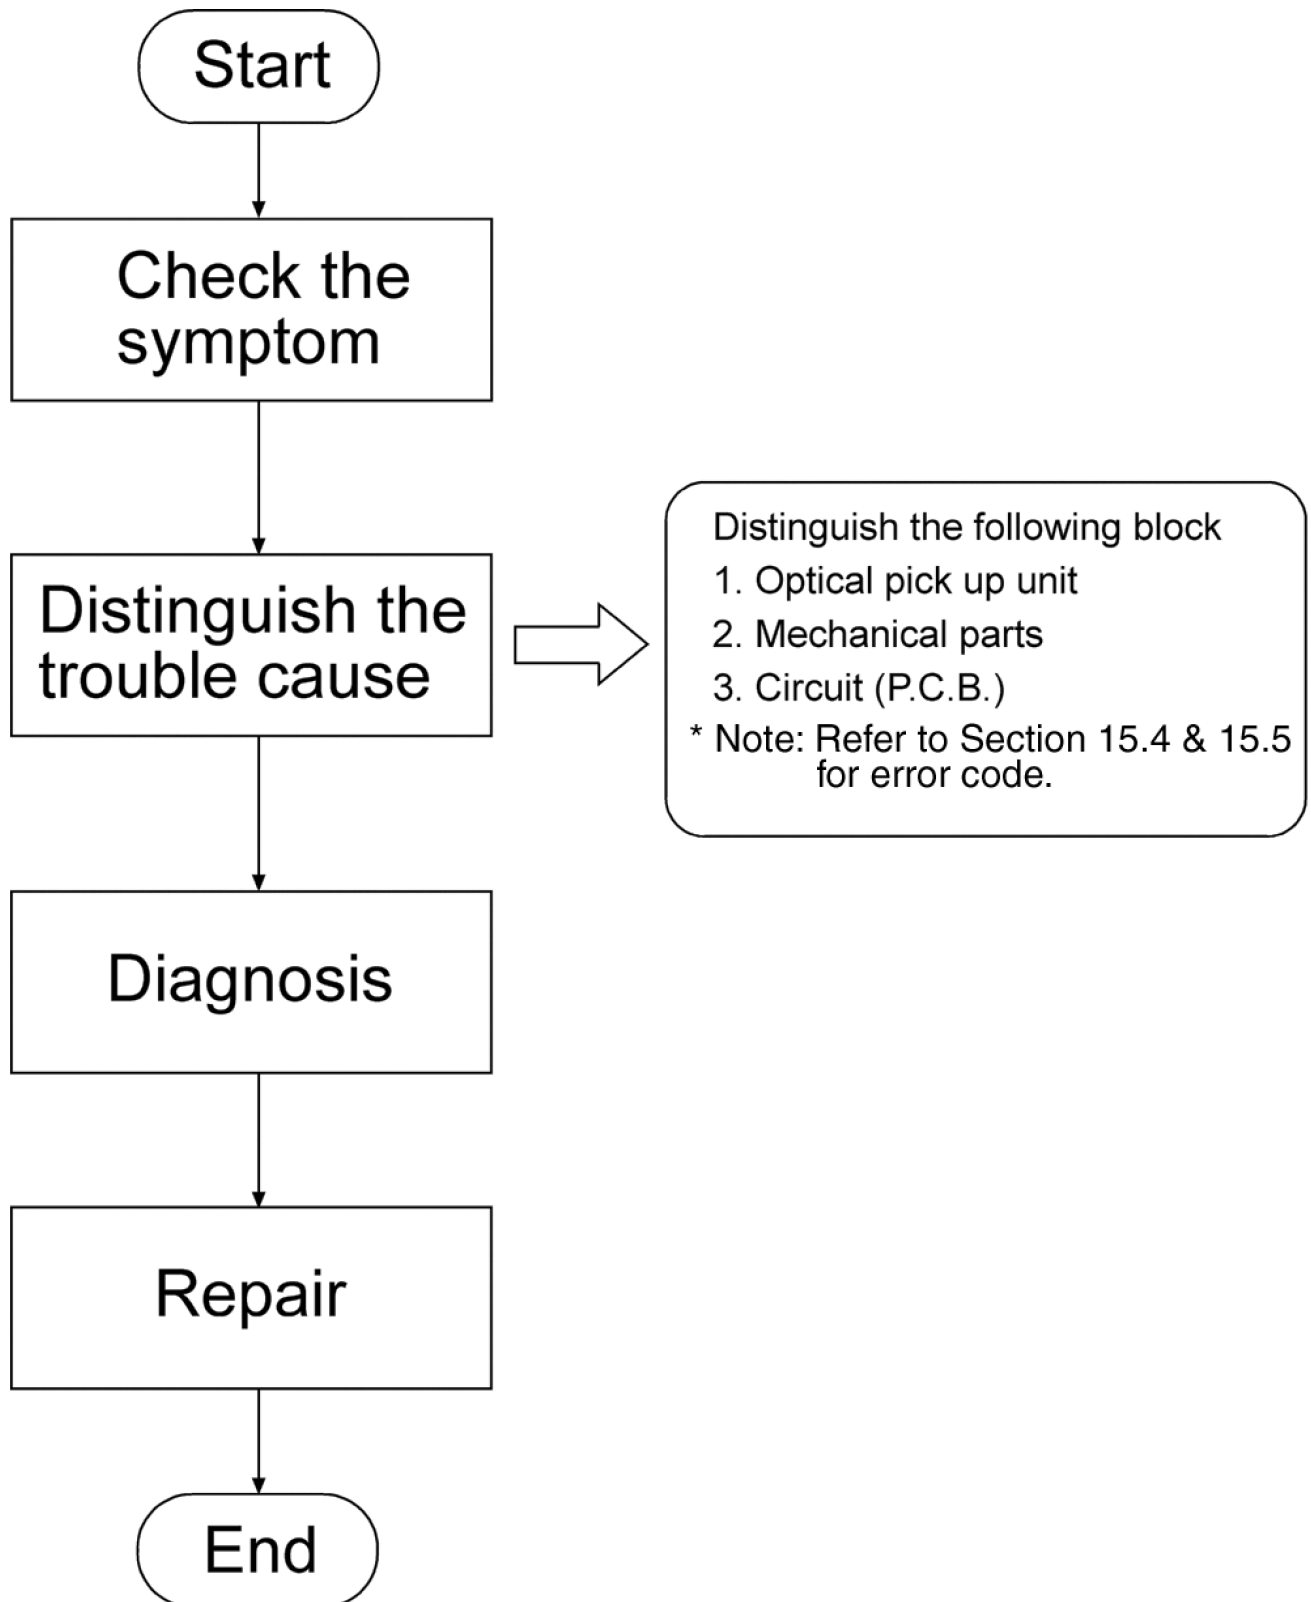

4. Limitations regarding the number of files on the media, etc.

- Total number of audio files: Maximum 450
- Total number of still picture files: Maximum 999
- Total number of animation files: Maximum 200
- Total number of directories: Maximum 400
- Length of a file name: Maximum 108 characters (Unicode)
- Total number of play lists: Maximum 200
- Number of contents in the playlist: Maximum 900

5. Composition of HighMAT disc

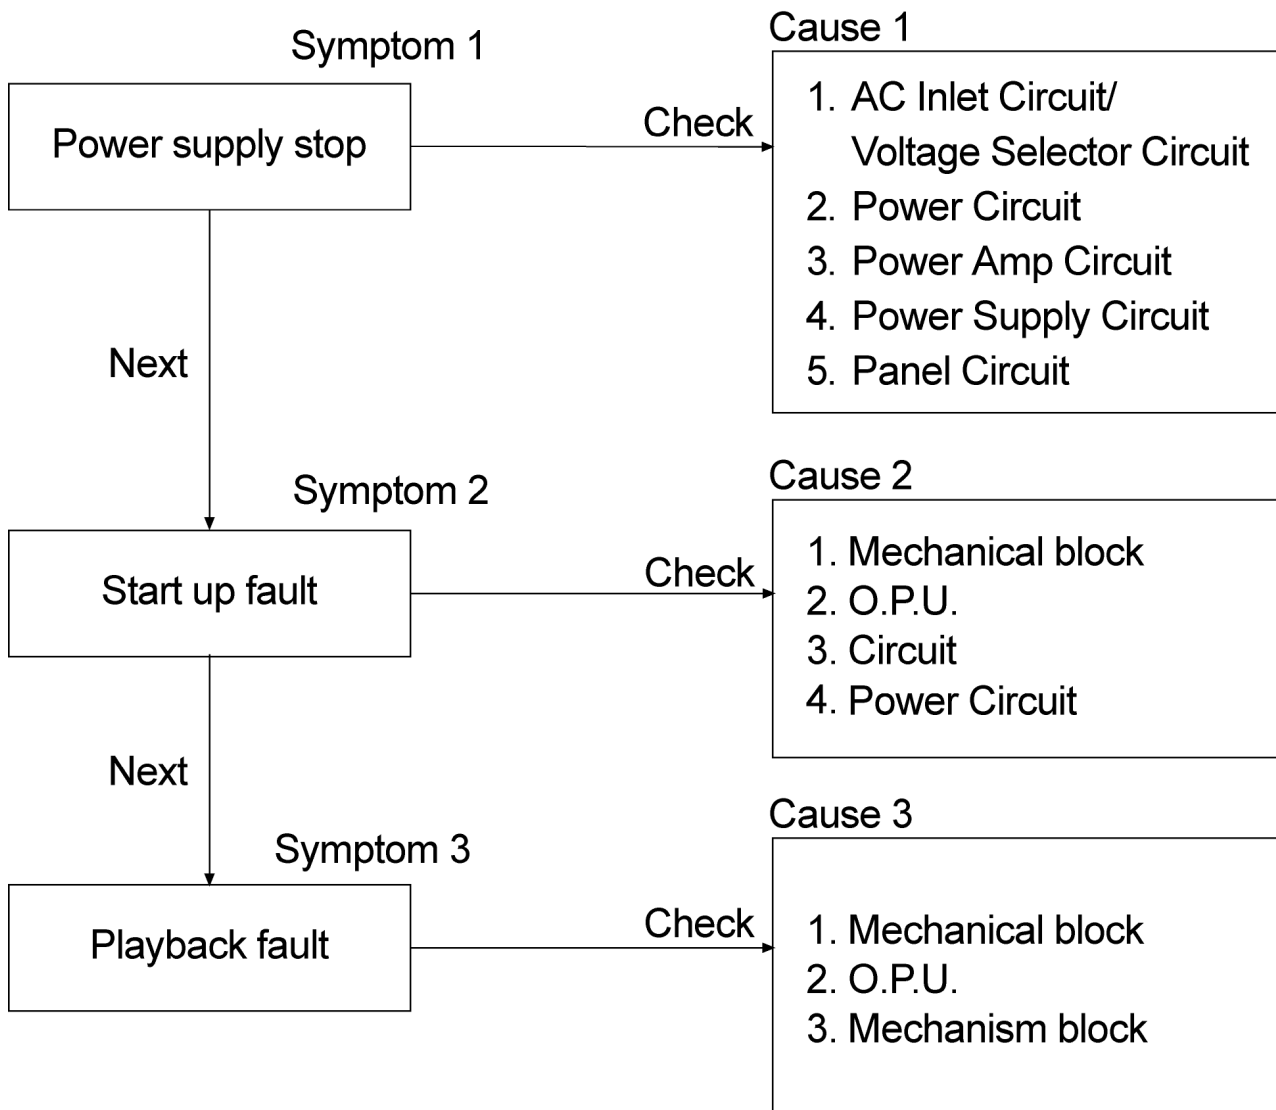

- Menu: Classified for the navigation of the HighMAT digital contents. When menu selected, its submenu or the play list will be displayed.
- Play list: A list in which one or more digital contents are arranged in order
- Group: Sub-divided group of a play list.
- Digital Contents: Audio, still picture, and animation data.

12 Procedure for repairing the set

12.1. Distinguish the trouble cause

- Check flow

How to distinguish the trouble

1. View mechanical part if visual damage occurred.

Confirm the movement of mechanical parts assembly (tray ass'y, loading mechanism ass'y, etc.).

2. Diagnose if Optical Pickup Unit is faulty (refer to diagnosis of Optical Pickup Unit).

3. If mechanism and OPU are OK, it is P.C.B.

Cause 1	Possible fault
1. AC Inlet Circuit/Voltage Selector Circuit	Fuse Blow (F1,F2), Power Transformer Problem(T501, T502), Wrong Selection of Selector (S501)
2. Power Circuit	Fuse Blow (F3, F4) FP951, FP950 open
3. Power Amp Circuit	IC502 faulty
4. Power Supply Circuit	IC500, IC501 faulty
5. Panel Circuit	FL Display Problem (-VP → Q950 faulty/ FP951 open/ D961 faulty) SVS6V to Micro-P (Q951/ D965 faulty) Problem

Cause 2	Possible fault
1. Mechanical block	Tray and loading mechanical block, traverse unit, deck unit
2. O.P.U.	Refer to the diagnosis of OPU
3. Circuit	IC307 faulty (check for pin 31, 32) IC701 faulty (check for pin 2, 23)
4. Power circuit	Refer to Cause 1

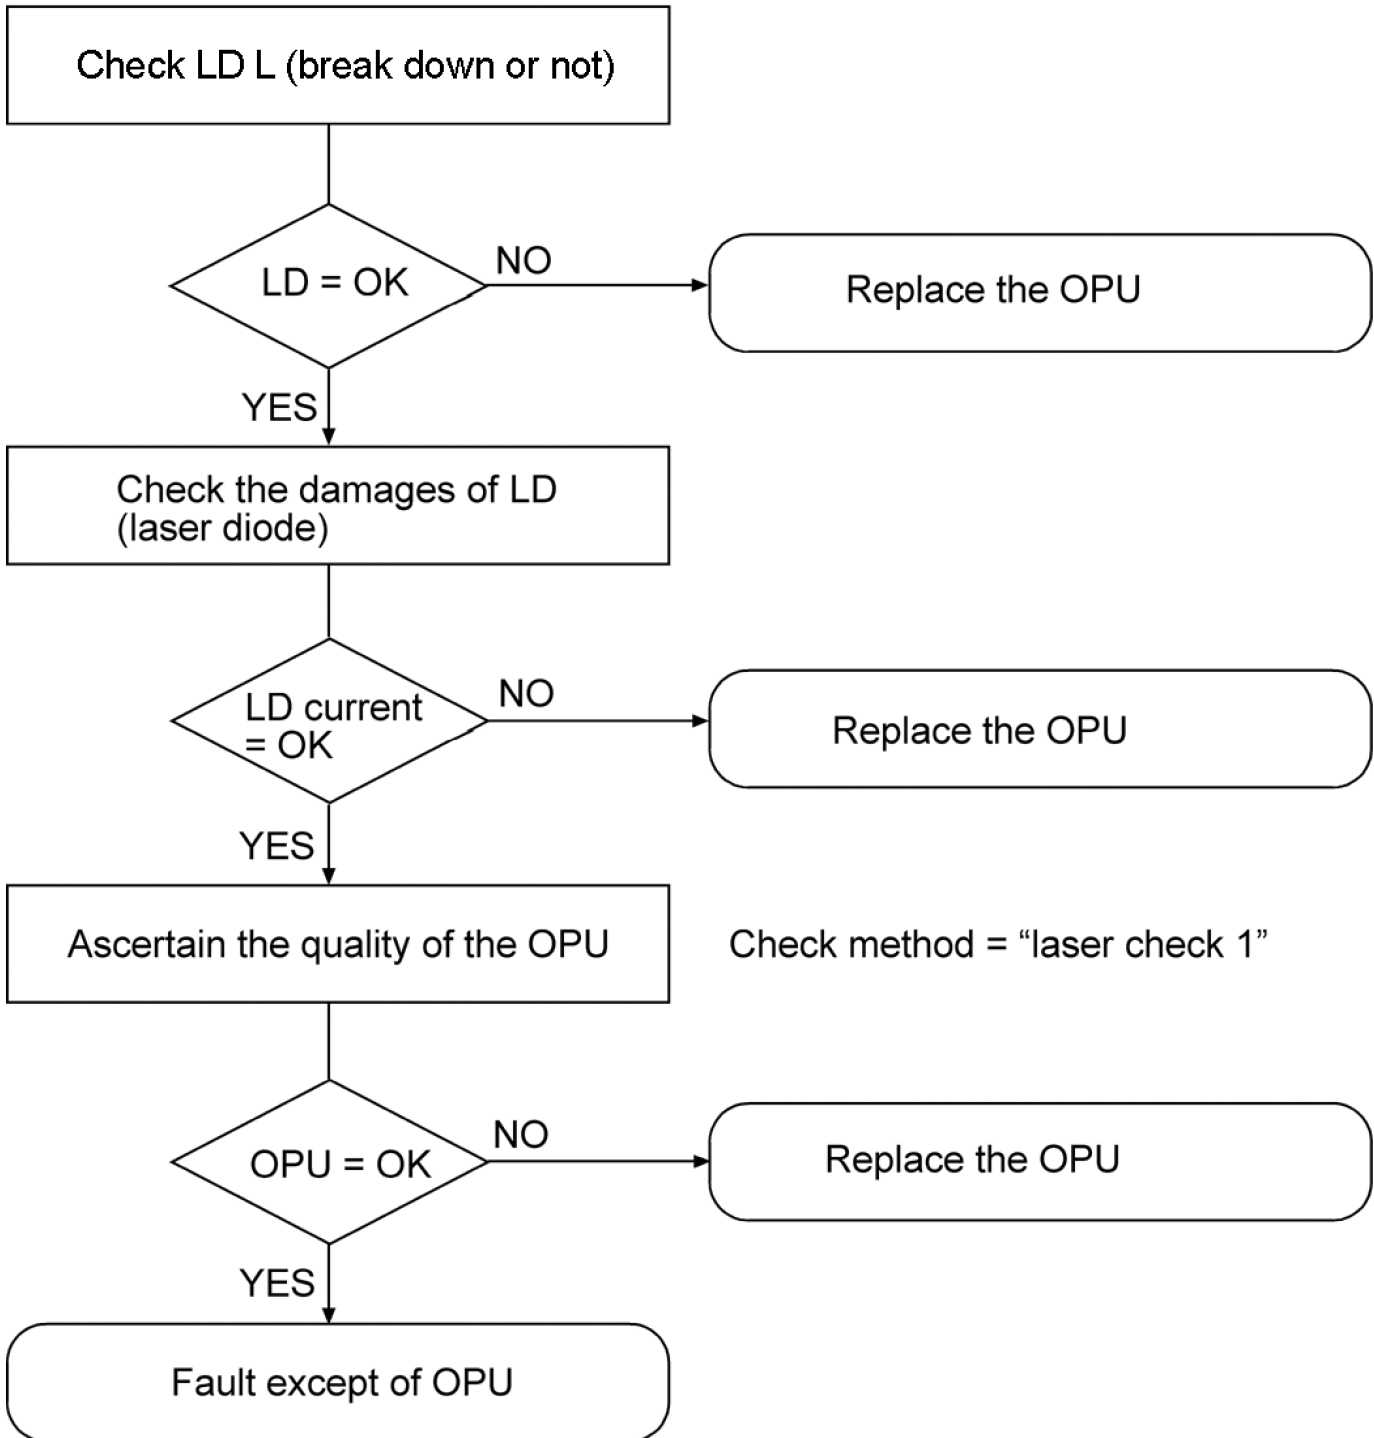

Cause 3	Possible fault
1. Mechanical block	Traverse block (Tilt adjustment)
2. O.P.U.	Refer to the diagnosis of OPU

Cause 3	Possible fault
3. DVD Module (1) Circuit	IC2501 (Tracking - pin 11 & 12) IC2501 (Focus - pin 13 & 14) IC2501 (spindle motor - pin 17, 18) IC2501 (Traverse motor - pin 15, 16) FG unit (pin 1, 2 at FP5102) IC3001, Video Problem (pin 158 (Y/PY/G), pin 160 (CB/PB/B), pin 161 (CR/PR/R), pin 163 (Y) and pin 164 (C))
4. Main Circuit	IC50 faulty (pin 17, 19, 21, 22, 24, 25 & 32 to JK302/JK301) JK301 & JK302 faulty IC700 (DSP IC) faulty (ckeck for pin 65, 69, 11, 14)

12.2. Diagnosis of Optical Pick-up Unit

Diagnosis Method

Diagnose the OPU by the following procedure

Note : When LD does not emit light after replacing the OPU, check the LD drive circuit in the module P.C.B.

How to distinguish Laser destruction/damage

Confirmation 1

Remove cover of mechanism block so that you will see the lens of optical pickup.

Confirm emission of laser at the moment when power switch is turned on.

If there is no laser emission, laser diode is faulty.

Confirmation 2

While pressing & hold "STOP" button on main unit, press "Display" button on the remote controller. Unit display laser current on FL.

From the reading of display, you can judge if laser diode is damaged or not.

Reading on the right side should be less than 70. If reading is more than 70, laser is damaged.

How to confirm if Optical Pickup is OK

Confirmation 1

1. Confirmation of jitter value with test disc. (Refer below for how to check jitter)
2. Lens cleaning.
3. Reconfirm jitter value.
4. Perform tilt adjustment. (Refer to tilt adjustment)
5. Reconfirm jitter value. (To confirm jitter value, while pressing & holding "STOP" button on main unit, press numeric "5" on remote controller.)

Unit display jitter value on FL.

Confirmation 2

If servo is very unstable due to optical error and you cannot confirm jitter value, clean the lens and check appearance of pickup unit (cutting coil of actuator, etc), then check circuitry.

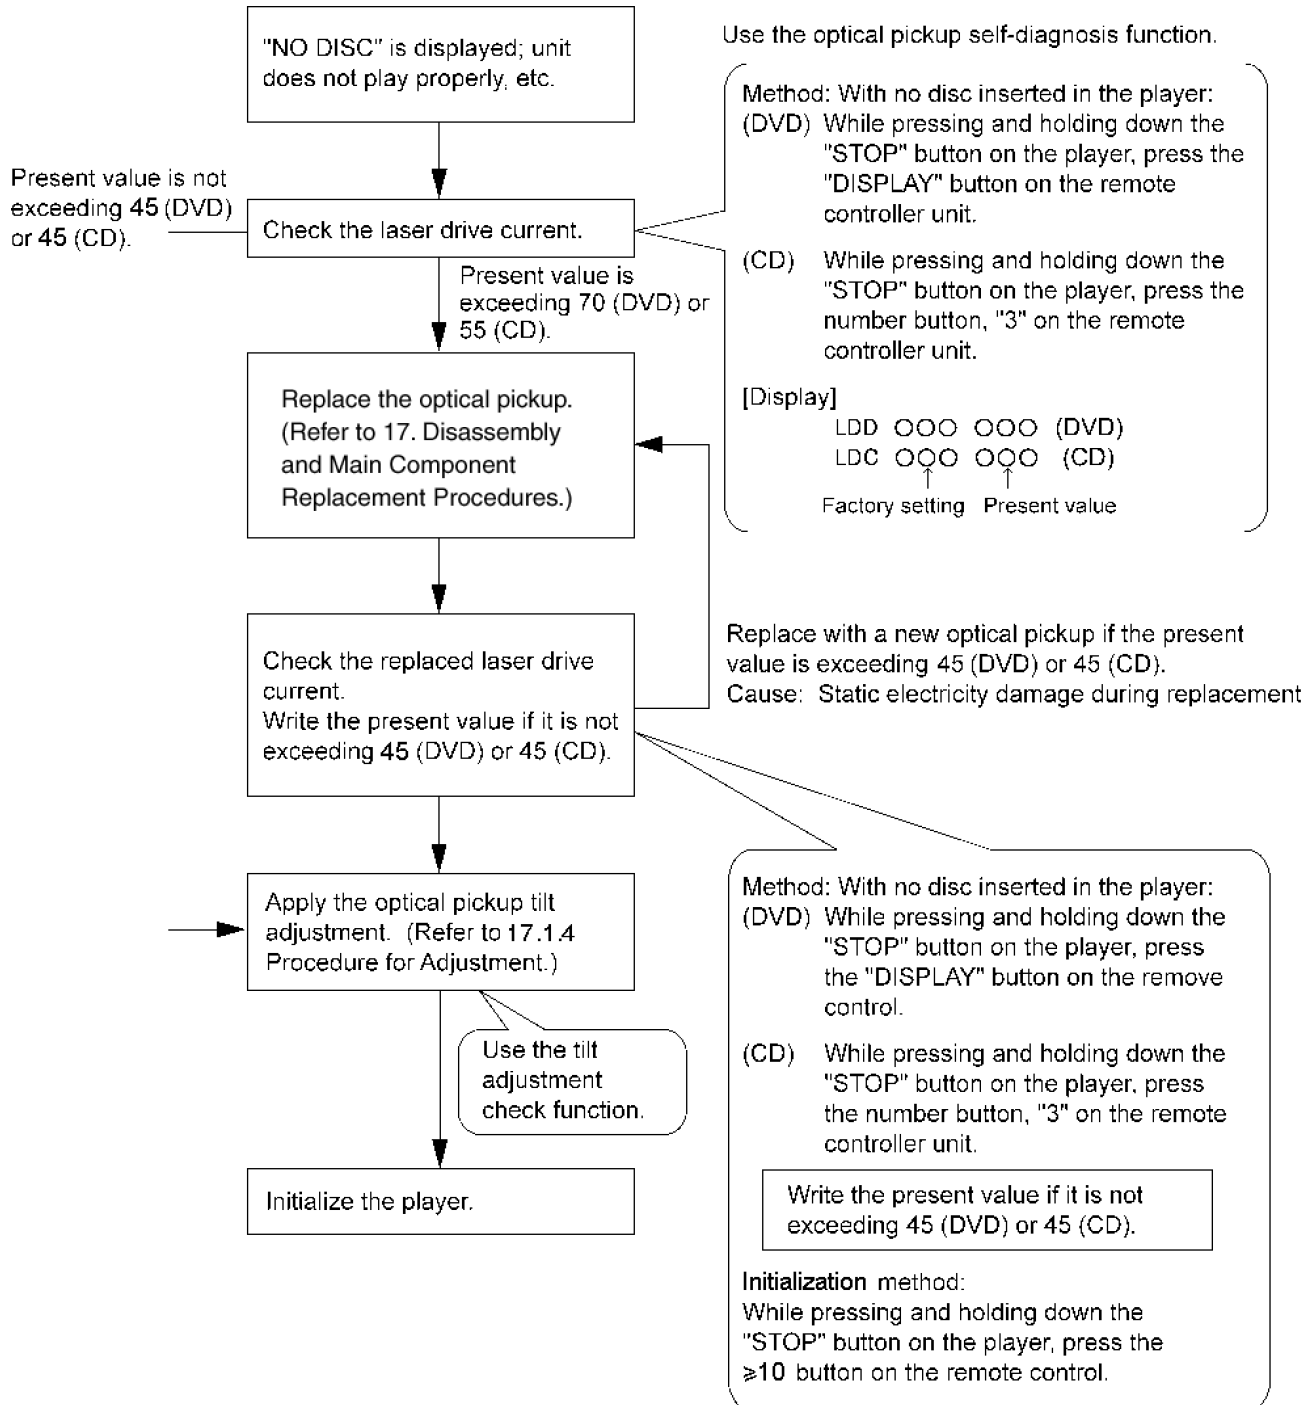

13 Optical Pickup Self-Diagnosis and Replacement Procedure

13.1. Self-diagnosis

This unit is equipped with the optical pickup self-diagnosis function and the tilt adjustment check function. Follow the procedure described below during repair in order to perform self-diagnosis and tilt adjustment effectively. Especially when "NO DISC" is displayed, be sure to apply the self-diagnosis function before replacing with an optical pickup. Replacement of optical pickup generally requires when the present value of laser drive exceeds 45 (DVD) or 45 (CD).

Note:

Start diagnosis within three minutes after turning on the power (as diagnosis fails when the unit becomes warm).

13.2. Cautions to Be Taken During Replacement of Optical Pickup and Spindle Motor

Before replacing the optical pickup and spindle motor, check a total usage time respectively. Follow the checking method described below.

Item	Status and Key Function	Display
Checking DVD, CD laser usage time	With the unit stopped and no disc inserted, press the ■ button on the player and the ▲ button on the remote controller unit.	T1_xxxx_yyyy xxxx(DVD), yyyy(CD): total time is displayed with a four-digit number by the ten hours.
Checking spindle motor usage time	With the unit stopped and no disc inserted, press the ■ button on the player and the ▶ button on the remote controller unit.	T2_xxxxx xxxxx: total time is displayed with a four-digit number by the ten hours.
Resetting DVD, CD laser usage time	While the DVD and CD laser usage times are displayed, press the ■ button on the player and the ▼ button on the remote controller unit.	T1_0000_0000
Resetting spindle motor usage time	While the spindle motor usage time is displayed, press the ■ button on the player and the ◀ button on the remote controller unit.	T2_0000

13.2.1. Cautions to be taken during replacement of optical pickup

Optical pickup could be damaged due to the static electricity discharged from human body. Wear proper protection gear against static electricity during optical pickup and its peripheral repair. (Refer to "Cautions to Be Taken When Handling Optical Pickup".)

- Do not touch laser diode, actuator and their peripherals.
- Do not check laser diode with a tester and such. (The tester will be destroyed.)
- For short-circuiting or removing laser diode, the use of an anti-static soldering iron is recommended. (Recommended model: HAKKO ESD product)
- Solder the land of the flexible cable in the optical pickup.

Note:

If an anti-static soldering iron is not available, short-circuit the terminal surface of the flexible cable and then the land using a clip or equivalent device.

14 Self-Diagnosis Function

This unit is equipped with the self-diagnosis function, which displays an error when it occurs, for use during servicing.

14.1. Automatic Displayed Error Codes

14.1.1. Automatic Display Function

For a power unit error, the code is automatically displayed.

F61: Automatically displayed on the LCD of the player.

14.1.2. Re-Display

· For F61 Display

- When the code, F61 is displayed, the power is automatically turned off.
- The code, F61 is displayed for three seconds, and then the current time appears.
- To retrieve the code, turn on the power button so that the code F61 appears, however, is switched to time display after three seconds, and the power is automatically turned off.

· For F76 Display

- The abnormalities is an output or the abnormalities in a power supply of POWER AMP.

14.1.3. Description of Error Code

14.1.3.1. F61

· State, Condition

When the power is turned on, the unit is automatically turned off. The power does not turn on.

· Cause, Troubleshooting

Power circuit system failure and/or direct current flown to speaker terminal

Identify the cause and replace with new parts.

14.2. Memorized Error Codes

14.2.1. Activating Self-Diagnosis Function and Displaying Method

1. Turn on the power.
2. Select DVD/CD function. With no DVD/CD inserted in the player, press and hold down the ■ button for at least two seconds, and press the “0” button on the remote control for at least two seconds in order to display “DVD_F_ _ _”.
3. Press the ■ button. If a memorized error is detected, the result of self diagnosis is displayed. (Ex.: T H15)
If several errors are detected, press the ■ button to display each.

14.2.2. Re-Display

- Press the power button to turn off the power, and then turn on the power.
- The details of self diagnosis are stored in the unit memory.
To retrieve them, follow the procedure described the above, “Activating Self-Diagnosis Function and Displaying Method”.

14.3. Mode Table 1

Following modes are available with combinations of the pressed buttons on the player and on the remote controller unit.

Player	Remote Controller Unit	Usage
■ button	0	Error code display (Refer to the Item 15.4. DVD Error Code Description)
	5	Tilt adjustment (Jitter)
	6	Region number and broadcasting system check
	8	Built-in program version check (Micro-P)
	DISPLAY	DVD laser drive current check
	3	CD laser drive current check
	PAUSE	Writing of laser drive current value after replacement of optical pickup (Do use this function only when optical pickup is replaced.)
	≧10	Initialization of the player (factory setting is restored.) Used after replacement of micro-computer and its peripherals and printed circuit board.

14.4. DVD/CD Self-Diagnosis Error Code Description

Error Code	State, Conditon	Cause, Troubleshooting
H15	The disc tray cannot be opened: it closes spontaneously.	Disc tray open/close detection switch (S1001) failure. (Check and replace)
H16	The disc tray cannot be closed: it opens spontaneously.	

Error Code	Meaning	Details
U. H. Error		
U11	Focus servo failure	
H01	Tray loading failure	
H02	Spindle servo failure	(Spindle servo, DSC, SP motor, CLV servo failure)
H03	Traverse motor failure	
H04	Tracking servo error	
H05	Seek timeout failure	
DSC system		
F500	DSC failure	DSC stops due to servo failure. (Startup, focus failure, etc.)
F501	DSC not Ready failure	Communication failure between DSC and system computer (No communication because DSC does not move)
F502	DSC Time out failure	See F500.
F503	DSC communication failure	Communication failure (Result failure occurs after communication command is transmitted.)
F505	DSC Attention Error	See F500.
F506	Invalid media	Disc is placed upside down; TOC is unreadable or invalid disc is inserted.
Disc Code		
F103	Illegal highlight position	Disc standard is possibly illegal when highlight is displayed.
IIC Error		
F4FF	Forced initialization failure (Time out)	
F880	Unsuitable task number	When a message arrives from not existing task
F890	A message is sent during AV task transmission	During transmission of a message to AV task
F891	Unable to transmit a message to AV task	When transmission of a message to AV task starts
F893	FROM altered	
F894	EEPROM failure	
F895	Firmware version compatibility problem	
F897	Incomplete initialization	
F8A0	Unsuitable message command	When transmission of a message to AV task starts

14.5. Error Codes Stored During No Play

Error Code	Meaning	System Computer Item	Setting Task	Internal error in system computer
F0BF	6) Unable to replay due to physical layer identification failure	PCND_NOPLAY_PHYSICAL 0x50	DriveManager	0xD0BF
F0C0	8) DVD: Unable to replay due to no DVD Video/Audio/VR	PCND_NOPLAY_VIDEO 0x70	DiscManager	0xD0C0
F0C1	9) DVD: Prohibited due to illegal regional code	PCND_NOPLAY_RCD 0x80	DiscManager	0xD0C1
F0C2	A) DVD: No replay due to PAL system	PCND_NOPLAY_PAL 0x90	DiscManager	0xD0C2
F0C3	B) DVD: All title replay prohibited in parental setting	PCND_NOPLAY_PTL 0xA0	DiscManager	0xD0C3
F0C4	C) VCD: Prohibited due to PHOTO CD format	PCND_NOPLAY_PHOTOCD 0xB0	DiscManager	0xD0C4
F0C5	D) VCD/CD: Prohibited due to CD-ROM without CD-DA	PCND_NOPLAY_CDROM 0xC0	DiscManager	0xD0C5

14.6. Mode Table 2

Following modes are available with combinations of the pressed buttons on the player and on the remote controller unit.

Item	Operational Condition and Key Function	Details	Display	TO Exit Mode
Jitter display	While the player is stopped and no disc is inserted, press and hold down the ■ button on the player and the number button, "5" on the remote controller unit.	Jitter display Measures and displays jitter. Measurement is repeated every second. Read error counter starts at 0 at the mode setting, and increased by one as data read fails at target block. A small defect is allowed to correct by retry. Any possibility is counted as one increment. Repetitive errors after retry increase by two levels or more.	J ^{*1} xxx ^{*2} _yyy ^{*3} _zz ^{*4} ^{*1} : Jitter display mode ^{*2} : Jitter measurement value ^{*3} : Read error counter ^{*4} : Focus driving value Values are shown to one decimal place in the decimal digit. Focus driving value is displayed in the hexadecimal digit.	Press the STOP or OPEN button.
Error code display	While the player is stopped and no disc is inserted, press and hold down the ■ button on the player and the number button, "0" on the remote controller unit.	Error code display Displays the latest error code stored in EEPROM.	DVDnn_F--- ^{*nn} : Error history ^{*--} : Error number DVD 01 FOBF	Press the OPEN button.
Measurement of laser current electricity initialization value	While the player is stopped and no disc is inserted, press and hold down the ■ button on the player and the ■ button on the remote controller unit.	Measurement of laser current electricity initialization value Memorizes each initialization value of DVD and CD in EEPROM.	LDO ^{*1} _013 ^{*2} _032 ^{*3} ^{*1} : Laser current electricity measurement mode ^{*2} : DVD current electricity value ^{*3} : CD current electricity value Values are shown in the decimal digit. The above example indicates that the current electricity initialization value is 13mA at DVD laser and 32mA at CD laser when laser is turned on.	Automatically exits the mode after five seconds.
Measurement of DVD laser current electricity	While the player is stopped and no disc is inserted, press and hold down the ■ button on the player and the DISPLAY button on the remote controller unit.	Measurement of DVD laser current electricity Measures DVD laser current electricity and displays the result together with the initialization value stored in EEPROM. After measurement, DVD laser is lit till the power is turned off (or goes off when the primary power is turned off).	LDD ^{*1} _012 ^{*2} _014 ^{*3} ^{*1} : DVD laser current electricity measurement mode ^{*2} : Current electricity initialization value stored in EEPROM ^{*3} : Present value of current electricity Values are shown in the decimal digit. The above example indicates that the current electricity initialization value is 12mA and its present value is 14mA.	Automatically exits the mode after five seconds.
ADSC internal RAM display	While the player is stopped and no disc is inserted, press and hold down the ■ button on the player and the number button "1" or "2" on the remote controller unit.	ADSC internal RAM display Reads and displays the RAM value inside ADSC. The address is renewed when the CLEAR key is pressed so that the values at eleven points appear.	A ^{*1} _FB0 ^{*2} _0000 ^{*3} ^{*1} :ADSC internal RAM display mode ^{*2} : Address ^{*3} : RAM value at displayed address Values are shown in the hexadecimal digit. The above example indicates that ADSC value at the address, FB0h is 0000h.	Press the STOP or OPEN button.

Item	Operational Condition and Key Function	Details	Display	TO Exit Mode
Measurement of CD laser current electricity	While the player is stopped and no disc is inserted, press and hold down the  button on the player and the number button "3" on the remote controller unit.	Measurement of CD laser current electricity Measures CD laser current electricity and displays the result together with the initialization value stored in EEPROM. After measurement, CD laser is lit till the power is turned off (or goes off when the primary power is turned off).	LDC ^{*1} _032 ^{*2} _032 ^{*3} ^{*1} : CD laser current electricity measurement mode ^{*2} : Current electricity initialization value stored in EEPROM ^{*3} : Present value of current electricity Values are shown in the decimal digit. The above example indicates the current electricity initialization value is 28mA and its present value is 26mA when laser is turned on.	Automatically exits the mode after five seconds.
User initialization	While the player is stopped and no disc is inserted, press and hold down the  button on the player and the number button "10" on the remote controller unit.	User initialization The user setting recovers the factory setting.	"INITIALIZE"	-
Region display	While the player is stopped and no disc is inserted, press and hold down the  button on the player and the number button, "6" on the remote controller unit.	Region display	[srrrxyzzzz] s : Panecon model type rrr : Panecon release number x : Syscon generation (45) y : Syscon model type zzz : Syscon release number	Automatically exits the mode after five seconds.
Firmware version display	While the player is stopped and no disc is inserted, press and hold down the  button on the player and the number button, "7" on the remote controller unit.	Firmware version display	rrr ^{*1} _xx ^{*2} y ^{*3} zzz ^{*4} ^{*1} : Panel computer release number ^{*2} : System computer generation ^{*3} : System computer model type ^{*4} : System computer release number	Automatically exits the mode after five seconds.
Region and firmware display	While the player is stopped and no disc is inserted, press and hold down the  button on the player and the number button, "8" on the remote controller unit.	Region and firmware version display	_r ^{*1} _xx ^{*2} y ^{*3} zzz ^{*4} ^{*1} : Region number ^{*2} : System computer generation ^{*3} : System computer model type ^{*4} : System computer release number	Automatically exits the mode after five seconds.
Laser use time	While the player is stopped and no disc is inserted, press and hold down the  button on the player and the  button on the remote controller unit.	Laser usage time Measures each for DVD and CD respectively.	T1_1234_5678 The numbers in the left show usage time for DVD laser and those in the right for CD laser. The four-digit number is shown by the ten hours in the decimal digit. The number after 0000 is 9999.	Automatically exits the mode after five seconds.
Reset laser use time	While the usage time 1 is displayed, press and hold down the  button on the player and the  button on the remote controller unit.	Laser usage time reset Resets both for DVD and CD at once.	T1_0000_0000	Automatically exits the mode after five seconds.
Spindle use time	While the player is stopped and no disc is inserted, press and hold down the  button on the player and the  button on the remote controller unit.	Spindle motor usage time	T2_12345 The four-digit number is shown by the ten hours in the decimal digit. The number after 00000 is 99999.	Automatically exits the mode after five seconds.

Item	Operational Condition and Key Function	Details	Display	TO Exit Mode
Reset spindle use time	While the usage time 2 is displayed, press and hold down the  button on the player and the  button on the remote controller unit.	Usage time 2 reset Spindle motor usage time	T2_00000	Automatically exits the mode after five seconds.
Communication error display	While the player is stopped and no disc is inserted, press and hold down the  button on the player and the MENU button on the remote controller unit.	Displays frequency of communication errors between system computer firm IC and mechanical computer IC during DVD module.	ERR_00/30	Automatically exits the mode after five seconds.

14.7. Tray Lock Function

14.7.1. Setting

• Disc Lock Function

1. With the SELECTOR on DVD/CD and POWER ON, hold down the [ STOP] KEY on the main unit, and then press the [POWER] KEY on the remote control for 3 seconds to enter to Lock mode A. [_ _ _ LOCKED _] will be displayed for 3 seconds, and then current disc will begin playing.
2. In Lock mode A, the following key is disabled.
[OPEN/CLOSE]

• Operation Lock Function

1. With the SELECTOR on DVD/CD and POWER ON, hold down the [CD PLAY] KEY on the main unit, and then press the [POWER] KEY on the remote control for 3 seconds to enter Lock mode B.
[_ _ _ LOCKED _] will be displayed for 3 seconds, and the current disc will begin playing.
2. Lock mode B primarily controls the selector and disc operations, and disenables for the following keys.

Note:

OPEN/CLOSE  button are invalid and the player displays “___LOCKED_” while the lock function mode is entered.

• Prohibiting operation of selector and disk

1. Select the DVD/CD function.
2. Press and hold down the  button on the player and the power button on the remote controller unit for at least three seconds. (The message, “___LOCKED_” appears when the function is activated.)

Note:

The following buttons are invalid and the player displays “___LOCKED_” while the lock function mode is entered.

Main unit:  ,  ,  ,  ,  ,
 ,  , 

Remote control:  ,  ,  ,  ,
 , 

14.8. Things to Do After Repair

Follow the procedure described below after repair.

1. While the power is on, press the  button to close the tray.
2. Press the power button to turn off the power.
3. Unplug the power cable.

Note:

It is prohibited to unplug the power cable while the tray is opened and to close the tray manually.

15 Cautions To Be Taken During Servicing

15.1. Recovery after the dvd player is repaired

- When Flash ROM or module(2) P.C.B. is replaced, carry out the recovery processing to optimize the drive. Playback the recovery disc to process the recovery automatically.
- Recovery disc (Product number=RFKZD03R004)
- Performing recovery
 1. Load the recovery disc (Product number: RFKZD03R004) to the player and run it.
 2. Recovery is performed automatically. When it is finished, a message appears on the screen.
 3. Remove the recovery disc.
 4. Turn off the power.

Note:

This unit requires no initialization process carried out after the traditional DVD players were repaired. When the recovery measures are taken, the customer setting will return to the factory setting as same as the procedure described in item "Initialization" in 9.6 is carried out. Write down the contents of the setting before recovery processing, and reset the player.

15.2. DVD Player Firmware Version Upgrade Process

Firmware of DVD player may upgrade to conform to improvement of its performance and quality including operational range, playability of non-standardized discs, etc. The version upgrade disc contains the recovery function, and the recovery disc is not necessary.

Note:

Version upgrade process cannot be complete if the AC power is cut off due to power failure and other occasions during the process. If this occurs, replace FLASH ROM and restart version upgrade. Version upgrade disc number is informed when ordered.

15.3. Firmware Version Upgrade Process by Using Disc and Recovery Process

- Recovery process
- Firmware version upgrade process

Both of the above procedures automatically start when the recovery disc is replayed. General CD-R disc allows version upgrade process and recovery process, making version upgrade through disc simple.

Recovery process: Optimization process of player after replacement of FLASH ROM, EEPROM, or module circuit board

Version upgrade process: Renewal of firmware for improvement of operational range and performance

15.3.1. Self-Diagnosis Function

- Total usage time display (spindle motor, DVD/CD laser)
- ADSC internal RAM display
- Others: Last error count.....20 items

Efficiency of failure diagnosis is expected to improve by using the above functions together with the repair process.

[Purpose of Use]

Total usage time display: used for estimating a failure due to exhausted spindle motor, laser, or other parts.

ADSC internal RAM display: used for deciding servo system failure according to servo learning values.

15.4. Using Recovery Disc

15.4.1. Recovery Process

1. Insert the recovery disc (RFKZD03R004) to the player to replay.
2. The recovery process automatically starts, and a message of completion prompts on the screen.
3. Remove the disc.
4. Turn off the power.

15.4.2. Version Upgrade Process

1. Insert the recovery disc to the player to replay.

2. The version of player is automatically checked and prompts if necessary.
3. Select version upgrade process using the cursor keys on the remote controller unit. (Select YES or NO)
4. a. If YES is selected, the process starts.
b. If NO is selected, only the recovery process is applied.
5. a. When the version upgrade process is complete, a message of completion appears on the screen. Remove the disc.
b. Follow the instruction appearing on the screen, and remove the disc.
6. Turn off the power.

15.5. Total Usage Time Display

1. Details of Operation/Display

1 2 3 4 5 6 7 8	Total usage time of DVD/CD lasers Time is shown by the ten hours in the decimal digit.
_ _ _ _ T 2 _ 1 2 3 4	Total usage time of spindle motor Time is shown by the ten hours in the decimal digit.

Keys for Operation:

Laser usage time: While the player is stopped and no disc is inserted, press both the  button on the player and the  button on the remote controller unit.

Spindle motor usage time: While the player is stopped and no disc is inserted, press both the  button on the player and the  button on the remote controller unit.

To reset the usage time, **while the usage time is displayed:**

Laser usage time: press both the  button on the player and the  button on the remote controller unit.

Spindle motor usage time: press both the  button on the player and the  button on the remote controller unit.

2. Purpose of Use

To obtain reference data of laser and spindle motor systems during failure diagnosis.

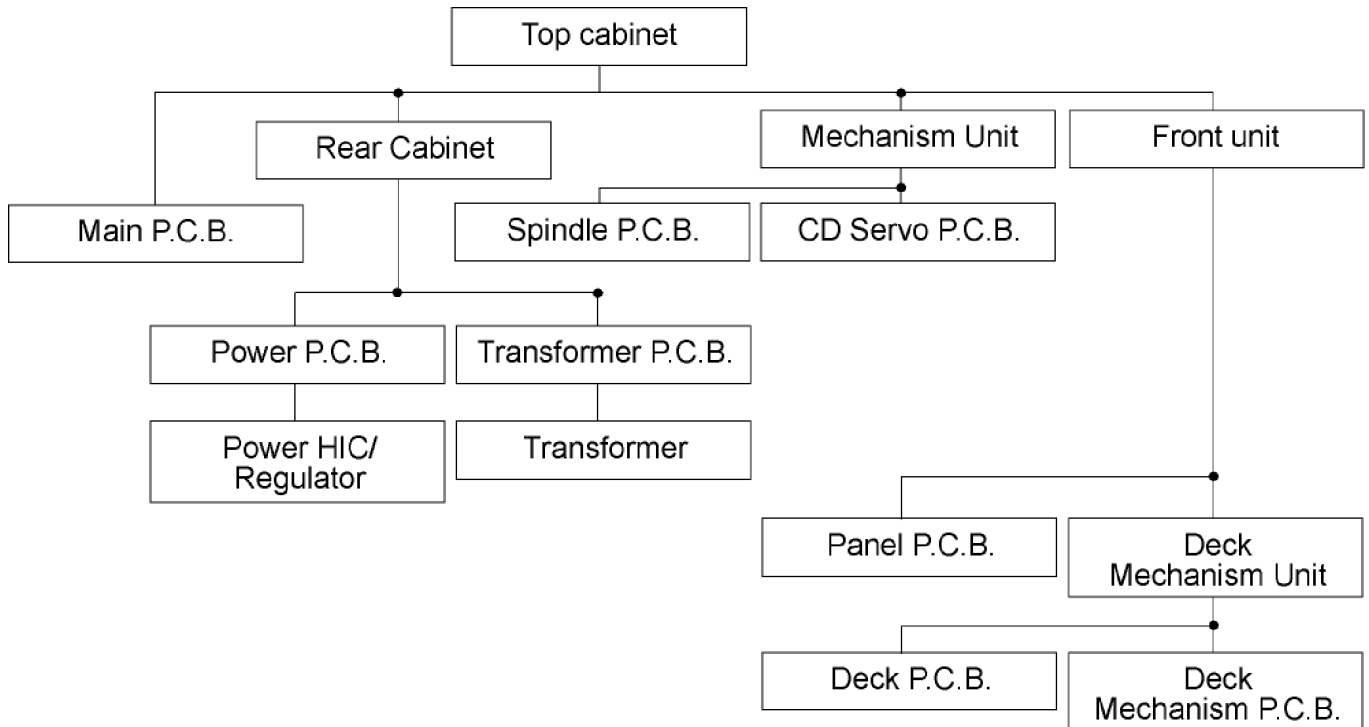

To check faulty parts during re-repair.

16 Disassembly and Assembly of Main Component

16.1. Disassembly flow chart

The following chart is the procedure for disassembling the casing and inside parts for internal inspection when carrying out the servicing.

To assemble the unit, reverse the steps shown in the chart as below.

16.2. Disassembly of Top Cabinet

Step 1 Remove 3 screws each side and 5 screws at rear panel.

Step 2 Lift up both sides of cabinet ass'y, push the cabinet ass'y toward the rear and remove the top cabinet.

16.3. Disassembly of DVD Module (2) P.C.B.

· Follow the (Step 1) - (Step 2) of Item 16.2.

Step 1 Remove 4 screws.

Step 2 Detach FFC boards (FP5201, FP3202, FP3203 & FP4202).

Step 3 Lift up DVD Module (2) P.C.B. as shown to remove it.

16.4. Disassembly for the Top Ornament Unit

(The DVD changer unit can be removed after the Top Ornament Unit is removed)

· Follow the (Step 1) - (Step 2) of Item 16.2.

When opening the disc tray automatically (Using Power Supply)

Step 1 Connect the AC power cord.

Step 2 Press the power button to power up the main unit.

Step 3 Press the OPEN/CLOSE button, the disc tray will be open automatically.

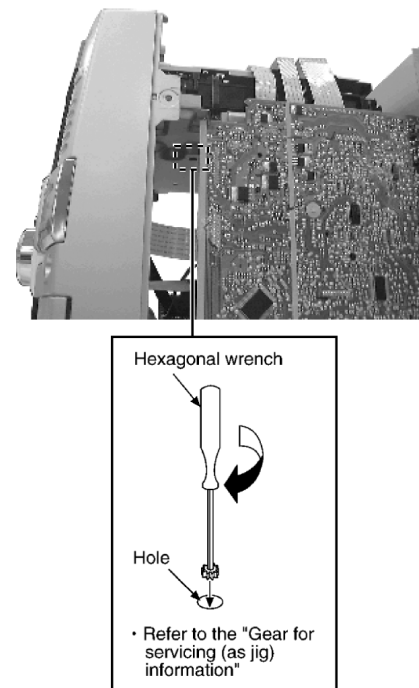

Step 4 Release the 2 claws, and then remove the Top Ornament Unit.

Step 5 Press the OPEN/CLOSE button, the disc tray will be close.

[Open the disc tray manually (Using service tools)]

Step 1 Insert the gear tool into the hole on the underside of changer chassis and then rotate in the direction of arrow. The disc tray will be open.

Step 2 Release the 2 claws, and then remove the CD lid cover.

Step 3 Repeat Step 1 but rotate in anti-clockwise direction.

16.5. Disassembly for DVD changer unit

- Follow the (Step 1) - (Step 2) of Item 16.2.
- Follow the Disassembly for the Top Ornament Unit of Item 17.4.

Step 1 Detach FFC Boards (FP5201, FP3202, FP3203 & FP4202).

Step 2 Remove 1 screw at rear cabinet as show below.

Step 3 Lift up the mechanism unit cover, and then push in the mechanism unit cover.

Step 4 Release the claws of both ends, and then lift up the DVD changer unit.

16.5.1. Disassembly of the DVD Module (1) P.C.B.

- Follow the (Step 1) - (Step 2) of Item 16.2.
- Follow the Disassembly for the Top Ornament Unit of Item 16.4.
- Follow the (Step 1) - (Step 4) of Item 16.5.

Step 1 Remove 4 screws.

Step 2 Remove the mechanism unit cover.

Step 3 Lay the unit.

Step 4 Connect the FFCs board from DVD Module (1) P.C.B..

16.6. Disassembly for Panel P.C.B., LED P.C.B. & Tact Switch P.C.B.

- Follow the (Step 1) - (Step 2) of Item 16.2.
- Follow the Disassembly for the Top Ornament Unit of Item 16.4.

Step 1 Lay the unit as shown below.

Step 2 Remove 2 screws at bottom chassis.

Step 3 Release the 2 claws, and then draw the front panel ass'y forward.

· Disassembly of Panel P.C.B.

Step 4 Remove the 8 screws.

Step 5 Disconnect FFC board (CN601 & CN602).

Step 6 Draw the Panel P.C.B. forward to remove it.

· Disassembly of Tact Switch P.C.B. & LED P.C.B.

Step 7 Remove the volume knob.

Step 8 Disconnect connector W601B.

Step 9 Remove 6 screws.

Step 10 Draw Tact Switch P.C.B. forward.

16.7. Disassembly of Main P.C.B., Power P.C.B. & Transformer P.C.B.

- Follow the (Step 1) - (Step 2) of Item 16.2.
- Follow the Disassembly for the Top Ornament Unit of Item 16.4.

Step 1 Remove the 11 screws.

Step 2 Push the catch outwards & draw the rear panel backwards to remove it.

Step 3 Detach connectors CN601, CN602 and CN302.

Step 4 Lift up the Main P.C.B. to remove it.

Caution Note:

Avoid using/ exerted strong force when removing the Main P.C.B.

Disassembly of Power P.C.B.

- Follow the (Step 1) - (Step 2) of Item 16.2.
- Follow the Disassembly for the Top Ornament Unit of Item 16.4.
- Follow the (Step 1) - (Step 4) of Item 16.5.
- Follow the (Step 1) - (Step 4) of Item 16.6.

(Step 1)

a x 2

(Step 1)

a x 2

Step 1 Remove the 4 screws.

Step 2 Detach wire.

NOTE:

Insulate Power P.C.B. with insulation material to avoid short circuit.

Disassembly of the Transformer P.C.B.

- Follow the (Step 1) - (Step 2) of Item 16.2.
- Follow the Disassembly for the Top Ornament Unit of Item 16.4.
- Follow the (Step 1) - (Step 4) of Item 16.5.

Step 1 Remove 4 screws.

Step 2 Disconnect connector CN950 & CN951.

• **Replacement of Power Amp IC**

Step 1 Remove the 2 screws fixed to the Power Amplifier IC.

Step 2 Remove 2 screws fixed to the Power Amplifier IC and Transistor Holders.

Step 3 Break the joint with a metal cutter as shown below.

16.8. DVD Changer Unit Main Component Replacement Procedures

16.8.1. Replacement of the Traverse Deck

- Follow the (Step 1) - (Step 2) of Item 16.2.
- Follow the Disassembly for the Top Ornament Unit of Item 16.4.
- Follow the (Step 1) - (Step 4) of Item 16.5.
- Follow the (Step 1) - (Step 2) of Item 16.5.1.

Step 4 Unsolder the terminals of Power Amp IC, replace the component.

Step 5 Fix back the bottom chassis with a screw as shown.

Step 1 Insert the gear with hexagonal wrench into the hole.

Step 2 Rotate the hexagonal wrench in the direction of arrow (clockwise), and then open the disc tray fully.

Step 3 With pressing the claw (A), rotate the hexagonal wrench

clockwise. (The slide plate R moves for a little amount.)

Step 4 Pressing the claw (B) in the direction of arrow (1), the connection lever moves in the direction of arrow (2).

Step 5 Lift up the traverse deck ass'y.

Step 6 Remove the traverse deck ass'y from the timing lever.

Caution:

When removing or inserting the traverse deck avoid touching the OPU lens and pressing onto the turntable.

Step 7 Remove 3 screws.

Step 8 Unsolder the motor terminals (4 points).

Step 9 Remove the holder pins.

Step 10 Remove the tab.

Step 11 Disengage the tabs from the traverse gear.

Step 12 Remove the traverse gear.

Step 13 Unscrew the screws.

Step 14 Remove the spring holders and the springs.

Step 15 Pull out the drive shaft and guide shaft.

(Step 14)

Step 16 Remove the FFC board from the connector, and then remove the DVD Module (1) P.C.B.

· **Installation of the DVD Module (1) P.C.B. after replacement**

Step 1 Connect the FFC board.

Step 2 Install the DVD Module (1) P.C.B. in the traverse deck ass'y.

Step 3 Remove 3 screws.

Step 4 Solder.

Step 3 Force the claw of timing lever.

· Note for installation of the DVD Module (1) P.C.B.

Before installing the CD servo P.C.B., move the optical pickup toward the outer edge from the mark “◀”.
 [Otherwise, the rest detect switch (S701) mounted on the CD servo P.C.B. may be damaged.]

Step 4 Force the disc tray fully.

· Installation for traverse deck ass'y

Step 1 Install the traverse deck ass'y to the timing lever.

Step 2 Align the boss of traverse deck ass'y with the slot of traverse cam gear.

Step 5 With pressing the claw (B) in the direction of arrow (1), force the connection lever in the direction of arrow (2).

16.8.2. Replacement for the disc tray

Step 1 Remove 4 screws.

Step 2 Remove the upper plate.

Step 3 Remove 3 screws.

Step 4 With lifting the claw in the direction of (1), draw the clamp SW P.C.B. in the direction of arrow (2).

Step 5 Remove the mechanism cover.

Step 6 Insert the gear with hexagonal wrench into the hole.

Step 7 Rotate the hexagonal wrench in the direction of arrow, and then open the disc tray fully.

Step 8 Release the both claws, and then draw the disc tray.

Step 9 With forcing the left guide bar manually because the left guide bar interferes with claw, draw the disc tray.

[Installation of the disc tray after replacement]

Step 1 Slide the drive rack fully in the direction of arrow.

Step 2 Holding the drive rack not to move, install the disc tray.

Step 3 Align the drive rack with the drive gear.

NOTE:

Force the right guide bar of tray base manually not to move upwards.

Step 4 Holding the disc tray manually, push the disc tray in the direction of the arrow.

16.8.3. Disassembly and reassembly for mechanism base drive unit

· Follow the (Step 1) - (Step 9) of Item 16.8.2.

Step 1 Remove 3 screws.

Step 2 Release the claw, and then remove the gear holder.

Step 3 Remove the belt and change gear spring.

NOTE:

Take care not to lose the change gear spring.

Step 4 Remove the pulley gear, change gear and UP/DOWN gear.

Step 5 Release the 2 claws, and then remove the bottom SW P.C.B..

Step 9 Pressing the claw (B) in the direction of arrow (1), force the connection lever in the direction of arrow (2).

Step 10 Move the slide plate 1 to the end of stock side.

Step 6 Install the tray lock spring to hook temporary.

Step 7 Release the claw, and then remove the tray lock.

Step 8 Release the claw, and then remove the rear lock.

Step 11 Lift up the left end of spindle base unit in the direction of arrow (1), and then remove the unit in the direction of arrow (2).

Step 12 Remove slide plate 1 and slide plate 2.

Step 13 Remove the traverse relay gear, traverse cam gear and drive gear.

[Disassembly/reassembly for the spindle base unit]

Step 1 Draw the 5 disc spacers.

Step 2 Pushing the claw, slide the support plate in the direction of arrow, and then remove it.

Step 3 Rotate the disc lever in the direction of arrow (1), draw the disc lever.

(Installation for disc lever spring)

NOTE:

Take care not to lose the disc lever spring.

Step 4 Release the 2 claws, and then draw the relay gear B.

Step 5 Release the 2 claws as shown below.

NOTE:

Hold the loading stopper ass'y manually because it is flipped by spring.

NOTE:

Hold the loading stopper ass'y manually because it is flipped by spring.

Step 6 Remove the cushion spring.

Step 7 Remove the loading stopper ass'y in the direction of arrow.

Step 8 Release the 2 claws, and then remove the relay gear A.

Step 9 Release the 2 claws, and then remove the spindle shaft.

Step 10 Remove the lower spindle spring with tweezers.

Step 11 Force the lower hook with thin tip of minus screwdriver.

Step 12 Squeeze the shaft of lower hook, and then draw it.

Step 13 Rotate the lower spindle in the direction of arrow until the lower spindle interferes with stopper.

Step 14 Insert the thin tip of minus screwdriver between the lower spindle and UP/DOWN base, and then slacken the lower spindle to release the stopper. Then, rotate the lower spindle and remove it.

Step 15 Rotate the UP/DOWN base at a 90° angle. Then,

spread the hold bars of loading stopper and remove the UP/DOWN base.

[Installation for loading stopper ass'y]

Step 1 Align the claw of loading stoppers ass'y with the slot of spindle base. (Caution should be exercised when alignment of claw due to the size of claws.)

Step 2 Lower the loading stopper ass'y, and then align the lower spindle with the trapezoid tooth of relay gear A.

Step 3 Force the loading stopper ass'y, latch the claw firmly.

[Reassembly for mechanism base drive unit]

Step 1 Install the traverse cam gear.

Step 2 Rotate the traverse cam gear to the direction of arrow.

Step 3 Install the drive gear and traverse relay gear.

*When installing the traverse relay gear, align the trapezoid tooth of gear with tooth of traverse cam gear.

Step 4 Install the slide plate 2 to the mechanism base, and then match to the connection lever.

Step 5 Install the slide plate 1 to the mechanism base, and then match to the connection lever and align the trapezoid tooth of traverse relay gear with the slide plate 1.

Step 7 Move the slide plate 1 to forward fully.

Step 8 Install the rear lock. (The claw should be latched.)

Step 9 Install the bottom SW P.C.B.. (The claw should be latched.)

Step 10 Install the tray lock. (The claw should be latched.)

Step 6 Install the spindle base unit. (First, slide plate 1.)

Step 14 Install the tray base, traverse ass'y, mechanism cover and upper plate.

[Operation check after servicing]

Check the proper operation of following items with gear and hexagonal screwdriver.

1. Open/close of tray base.
2. Moving the tray base to the stock side.
3. UP/DOWN operation of spindle base unit.
4. UP/DOWN operation of traverse ass'y.

16.8.4. Replacement for the motor ass'y

- Follow the (Step 1) - (Step 7) of Item 16.8.2.

Step 11 Remove the tray lock spring from hook, and then latch to the tray lock.

Step 12 Install the UP/DOWN gear, change gear, change gear spring, pulley gear and belt in the order of (1) - (5).

Step 13 Install the gear holder, and then tighten the screw (a).

Step 1 Install the belt temporarily.

NOTE:

Take care not apply the grease to the belt.

Step 2 Upset the CD loading unit.

Step 3 Remove 3 screws.

Step 4 Unsolder the plunger terminals (2 points).

Step 5 Unsolder the motor terminals (2 points).

Step 6 Release the 2 claws (A), and then remove the Motor P.C.B.

Step 7 Release the claw (B), and then remove the motor ass'y.

[Notice for motor ass'y installation]

1. Locate the name plate of motor to the traverse ass'y.
2. Align the hole of motor with the ribs.

16.9. Disassembly of Deck Mechanism Unit

- Follow the (Step 1) - (Step 2) of Item 16.2.
- Follow the Disassembly for the Top Ornament Unit of Item 16.4.
- Follow the Disassembly for the DVD changer unit of Item 16.5.

Step 1 Lay the unit as shown.

Step 2 Remove 2 screws.

Step 3 Release the 2 claws, and then draw the front panel ass'y forward.

Step 4 Detach FFC Board (CN601 & CN602).

Step 5 Detach flat cable wire (CN1001).

Step 6 Push the lever upward, and then open the cassette lid ass'y (For DECK1 and DECK2).

Step 7 Remove the 5 screw.

Step 8 Tilt the cassette mechanism in the direction of arrow (1), and then remove it in the direction of arrow (2).

· Disassembly of Deck P.C.B.

Step 9 Unsolder the motor terminals.

Step 10 Remove 4 screws.

Step 11 Remove Deck P.C.B.

* The mechanism as shown below is for DECK1. For the one of DECK 2, perform the same procedures.

16.9.1. Replacement for the CD motor ass'y, capstan belt A, capstan belt B and winding belt

Step 1 Release the 2 claws, and then remove the head connector.

Step 2 Remove 6 screws.

Step 3 Remove the sub chassis.

· Disassembly of pinch roller ass'y & head block

Step 12 Release the 2 claws, and then remove the pinch roller (R), (F).

Step 13 Release the 2 claws, and then remove the head connector.

Step 14 Remove 2 screws.

Step 5 Remove the flywheel R.

Step 6 Release the claw of tape side, and then remove the winding lever and spring.

Step 7 Remove the flywheel F.

[Installation of the belt]

Step 1 The boss and marking should be positioned horizontally.

Step 4 Remove 2 screws.

Step 2 Put the winding belt on the pulley temporarily.

Step 3 Install the flywheel F.

Step 4 Put the winding belt on the flywheel F.

Step 5 Install the winding lever and spring while pressing the winding arm in the direction of arrow.

Step 6 Install the flywheel R.

NOTE:
The winding lever should be positioned as shown below.

Step 7 Put the capstan belt A temporarily as shown below.

Step 8 Put the capstan belt B on the motor ass'y pulley.

Step 9 Install the sub chassis to the mechanism, and then tighten screws.

Step 10 Remove 3 screws.

Step 11 Put the capstan belt B as shown below.

(Step 11)

Step 12 Put the capstan belt A on the motor ass'y pulley.

16.10. Replacement for the cassette lid ass'y

· Follow the (Step 1) - (Step 2) of Item 16.2.

Step 1 Force the lever upward, open the cassette lid ass'y. (For DECK1 and DECK2)

Step 2 Lift up the cassette lid ass'y in the direction of arrow. (For DECK1 and DECK2).

Step 3 Remove the cassette lid ass'y. (For DECK1 and DECK2).

16.11. Counter-measure for tape trouble

- Follow the (Step 1) - (Step 2) of Item 16.2.

Step 1 If a cassette tape cannot be removed from the deck since the tape is caught by the capstan or pinch roller during playback or recording, rotate the flywheel F in the direction of the arrow to remove the tape.

Step 2 Force the lever upward and open the cassette lid ass'y. Take the cassette tape off.

17 Measurements and Adjustments

17.1. Cassette Deck Section

- Measurement Condition
 - Reverse-mode selector switch: 
 - Tape edit: NORMAL
 - Make sure head, capstan and press roller are clean.
 - Judgeable room temperature $20 \pm 5 \text{ }^\circ\text{C}$ ($68 \pm 9 \text{ }^\circ\text{F}$)
- Measuring instrument
 - EVM (DC Electronic voltmeter)
 - Digital frequency counter
- Test Tape
 - Tape speed gain adjustment (3 kHz, -10 dB); QZZCWAT

17.1.1. Head Azimuth Adjustment (Deck 1/2)

Caution:

- Please replace both azimuth adjustment screw and springs simultaneously when readjusting the head azimuth. (shown in Fig. 2) Even if you wish to readjust the head azimuth without replacing the screws and springs, a fine adjustment to the azimuth screw and spring.
- Please remove the screw-locking bond left on the head base when replacing the azimuth screw.
- If you wish to readjust the head azimuth, be sure to adjust with adhering the cassette tape closely to the mechanism by pushing the center of cassette tape with your finger. (shown in Fig. 3)

1. Playback the azimuth adjustment portion (8 kHz, -20dB) of the test tape (QZZCFM) in the forward play mode. Vary the azimuth adjustment screw until the output of the R-CH (PB OUT-R) are maximized.

2. Perform the same adjustment in the reverse play mode.

3. After the adjustment, apply screwlock to the azimuth adjusting screw.

Fig. 1

-  Screw
-  Springs

Fig. 2

Fig. 3

Fig. 4

17.1.2. Tape Speed Adjustment (Deck 1/2)

1. Set the tape edit button to "NORMAL" position.
2. Insert the test tape (QZZCWAT) to DECK 2 and playback (FWD side) the middle portion of it.
3. Adjust Motor VR (DECK 2) for the output value shown below.

Adjustment target: 2940 ~ 3060 Hz (NORMAL speed)

4. After alignment, assure that the output frequency of the DECK 1 FWD are within ± 60 Hz of the value of the output frequency of DECK 2 FWD.

UNIT

Fig. 1

17.1.3. Bias and Erase Voltage Check

1. Set the unit "AUX" position.
2. Insert the Normal blank tape (QZZCRA) into DECK 2 and the unit to "REC" mode (use "I REC/STOP" key).
3. Measure and make sure that the output is within the standard value.

Bias voltage for Deck 2	14 \pm 4mV (Normal)
Erase voltage for Deck 2	80mV (Normal)

Fig. 2

Fig. 3

17.1.4. Bias Frequency Adjustment (Deck 1/2)

1. Set the unit to "AUX" position.
2. Insert the Normal blank tape (QZZCRA) into DECK 2 and set the unit to "REC" mode (I use "REC/STOP" key).
3. Adjust L1002 so that the output frequency is within the standard value.

Standard Value: 97 ±8 kHz

Fig. 4

17.2. Tuner Section

17.2.1. AM-IF Alignment

1. Connect the instrument as shown in Fig. 5.
2. Set the unit to AM mode.
3. Apply signal as shown in Fig. 5 from AM-SG.
4. Adjust Z102 so that the output frequency is maximized in Fig. 6.

Fig. 5

Fig. 6

Fig. 7

17.2.2. AM RF Adjustment

1. Connect the instrument as shown in Fig. 7.
2. Set the unit to AM mode.
3. Set AM-SG to 520kHz.
4. Receive 520kHz in the unit.
5. Adjust Z101 (OSC) so that the EVM-AC is maximized.
6. Set AM-SG to 600Hz.
7. Receive 600Hz in the unit.
8. Adjust Z101 (ANT) so that the EVM-SG is maximized.
9. Set AM-SG to 520kHz.
10. Receive 520kHz in the unit.
11. Adjust Z101 (OSC) so that the EVM-DC value is with 1.1±0.5V.

- The voltage value and waveforms are the reference voltage of this unit measured by DC electronic voltmeter (high impedance) and oscilloscope on the basis of chassis. Accordingly, there may arise some error in voltage values and waveforms depending upon the internal impedance of the tester or the measuring unit.

(()) : CD < > : FM

• Importance safety notice :

Components identified by  mark have special characteristics important for safety. Furthermore, special parts which have purposes of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used. When replacing any of components, be sure to use only manufacturer's specified parts shown in the parts list.

Caution !

IC, LSI and VLSI are sensitive to static electricity.

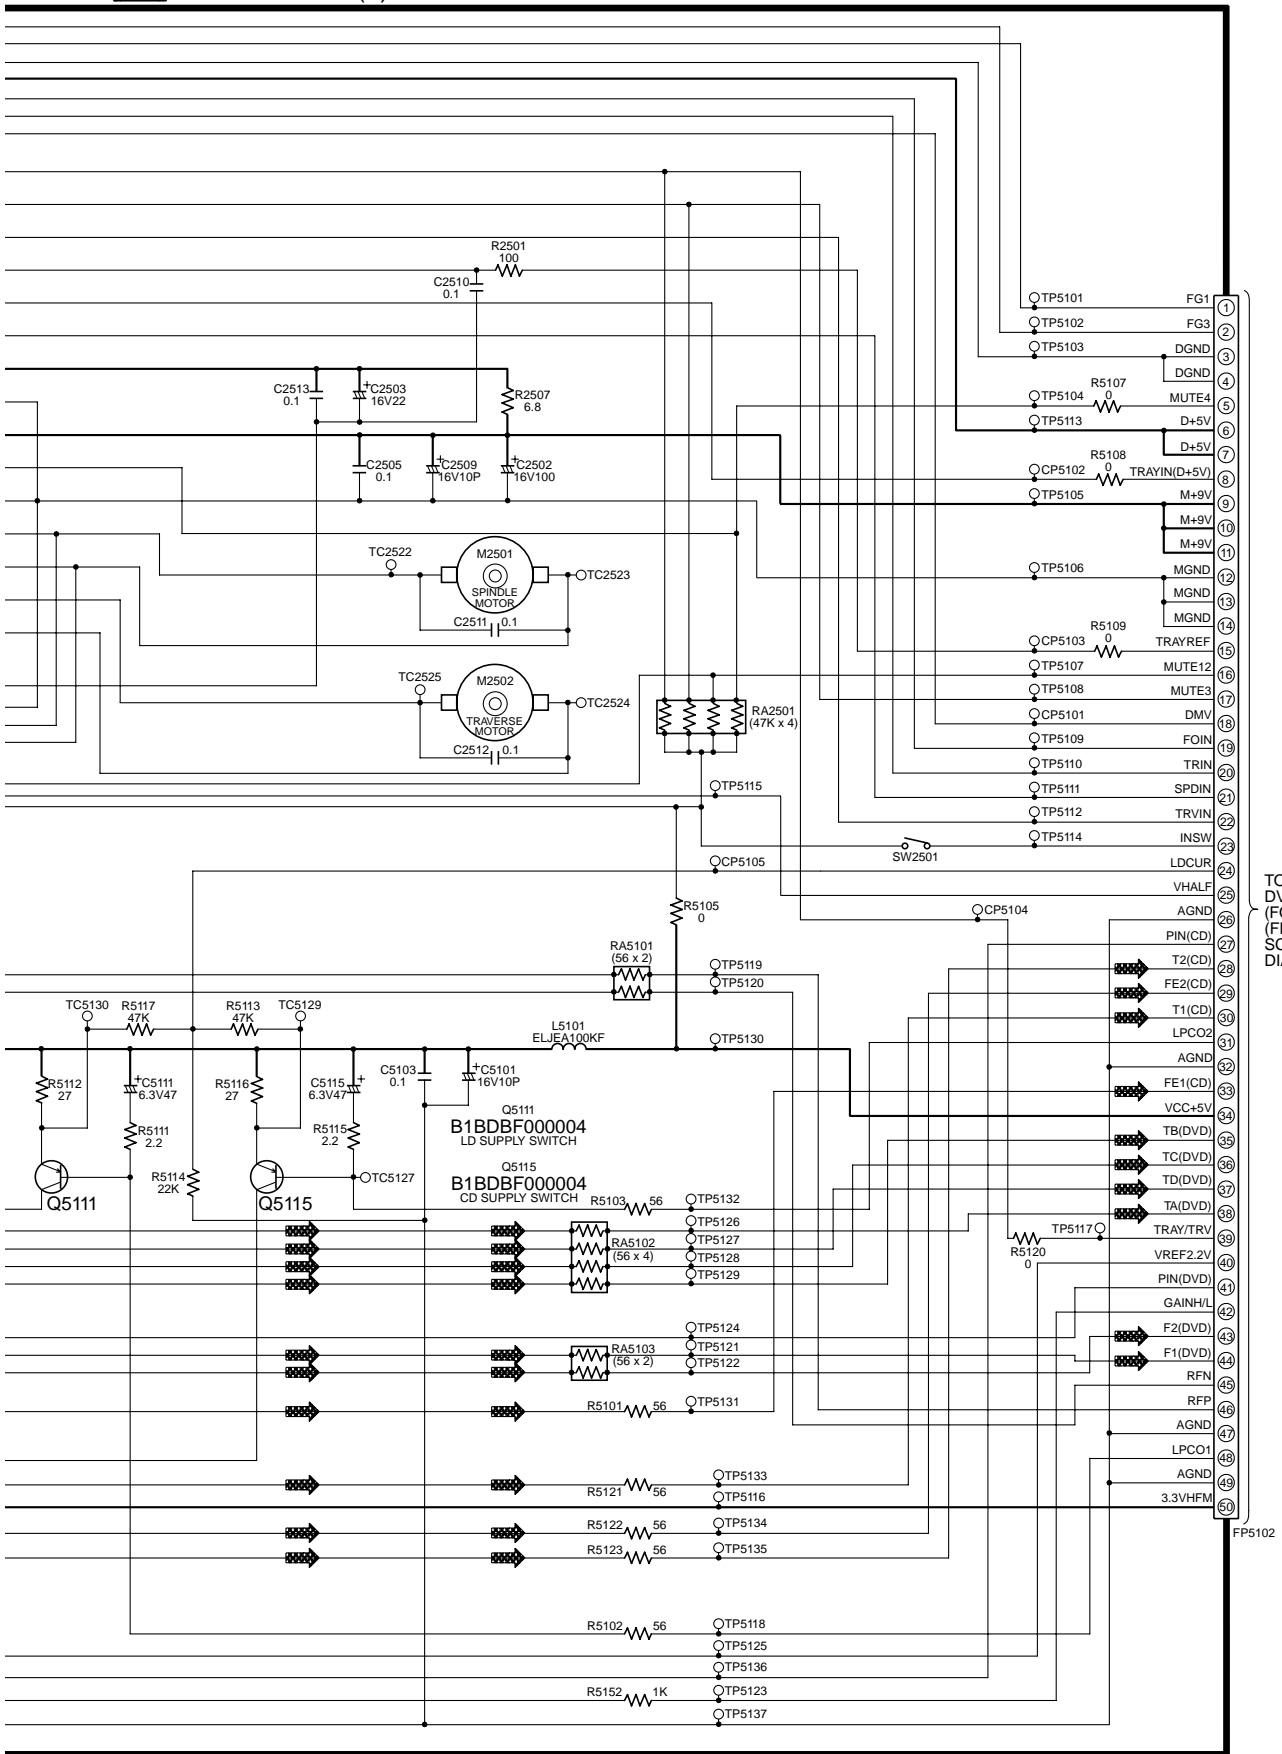

Secondary trouble can be prevented by taking care during repair.

- Cover the parts boxes made of plastics with aluminium foil.
- Put a conductive mat on the work table.
- Ground the soldering iron.
- Do not touch the pins of IC, LSI or VLSI with fingers directly.

23 Terminal Function of IC

23.1. IC600 (C2BBHF000077) System Microprocessor

Pin No.	Mark	I/O	Function
1	EECS	O	EEPROM Chip Select
2	SERA	O	EXP_DECK_CK/ EXP2_CK/EE_CK
3	CHG_HALF	O	Changer Half Output
4	CHG_CW	O	Changer Motor CW
5	CHG_CCW	O	Changer Motor CCW
6	CHG_PLGR	O	Changer Plunger Output
7	DCDET	I	DC Detect Input
8	NJU_LAT	O	NJU LAT Output
9	PCNT	O	Main Transformer Control Output
10	KARA_LA/REGIN	I/O	Karaoke LSI Strobe/ Region In
11	RESET	I	Reset
12	XCin	I	32.768 khz Sub Clock
13	XCout	O	32.768 khz Sub Clock
14	VSS	-	GND
15	CF1	I	Main Clock
16	CF2	O	Main Clock
17	VDD1	-	VDD (+5V)
18	KEY3	I	KEY3 input
19	KEY2	I	KEY2 input
20	KEY1	I	KEY1 input
21	CHG_AD1	I	Open/Clamp Chnager Input
22	CHG_AD2	I	Position/Bottom Changer Input
23	SPE	I	Speana Input
24	DECK2	I	Deck Conduction Input (RINHF/MODE2/ RINHR/HALF2)
25	DECK1	I	Deck Condition Input (MODE1/HALF1)
26	DECK3	I	Deck Condition Input (PHOTO1/PHOTO2)
27	CHG_SW	I	Changer SW1 and SW2 Input
28	SYNC	I	AC Failure Detect Input
29	RMT	I	Remote Control Input
30-40	GRD1-11	O	FL Display
41-45	SEG1-5	O	FL Display
46	VDD3	-	(+5V)
47-50	SEG6-9	O	FL Display
51	VP	-	FL Display
52-62	SEG10/REG1- SEG20/REG11	O	FL Display/Region Setting Control 1
63-71	SEG21-SEG29	O	FL Display
72	VDD3	-	(+5v)
73-76	SEG30-SEG33	O	FL Display
77	PLL_IF (PLL_DA_IN/ST)	I	PLL Data Input/Tuner Stereo
78	VOL_A	I	Volume Jog A Input
79	VOL_B	I	Voume Jog B Input
80	SD (TU_SIG_DEC_IN)	I	Tuner Signal Detect Input
81	SP_C	O	Speana Control Output C
82	SP_B	O	Speana Control Output B
83	SP_A	O	Speana Control Output A
84	DVD_MUTE	I	DVD Mute Output
85	SERB (EX3CK/PLLCK)	O	EXP3 CK/PLL_CK
86	SERC (EXDECK_DA/EX1_ DA/EX3_DA)	O	EXP DECK DA /EXP1 DA/EXP3 DA
87	SERD (EX1CK/EX2 _DA/EE_DA)	O	EXP1 CK/EXP2 DA/EE_DATA

Pin No.	Mark	I/O	Function
88	PLLDA	O	PLL DATA Output
89	VSS	-	GND
90	VDD2	-	+5V
91	MUTE_A	O	Audio Mute Output
92	PLLCE	O	PLL CE
93	DSP_CS	O	DSP CS
94	DSP_RST/	O	DSP IC Reset Output
95	SERE	O	DSP/6CH VOL/NJU/KARAOKE LSI Data Output
96	VOL_CS+	O	6CH VOL CS
97	SERF	O	DSP/6CH VOL/NJU KARAOKE LSI CK Output
98	DVD_CMD	O	DVD CMD Data Output
99	DVD_STA	I	DVD Status Data Input
100	DVDCLK	O	DVD CLK Output

24 Parts Location and Replacement Parts List

Notes:

- Important safety notice:
Components identified by \triangle mark have special characteristics important for safety.
Furthermore, special parts which have purposes of fire-retardent (resistors), high-quality sound (capacitors), low noise (resistors), etc are used.
When replacing any of these components, be sure to use only manufacturer's specified parts shown in the parts list.
- The parenthesized indications in the Remarks columns specify the areas or colour. (Refer to the cover page for area or colour)
Parts without these indications can be used for all areas.
- Warning: This product uses a laser diode. Refer to caution statements on "Precaution of Laser Diode".
- Capacitor values are in microfarads (μ F) unless specified otherwise, P= Pico-farads (pF), F= Farads.
- Resistance values are in ohms, unless specified otherwise, 1K=1,000 (OHM).
- The marking (RTL) indicates that the Retention Time is limited for this items. After the discontinuation of this assembly in production, the item will continue to be available for a specific period of time. The retention period of a availability is dependent on the type of assembly, and in accordance with the laws governing part and product retention. After the end of this period, the assembly will no longer be available.
- [M] markings in the Remarks columns indicates parts supplied by **PAVCSG**.
- [SPC] markings in the Remarks columns indicates parts that are supplied by **PAVC**.

49	RYQX0094C-S	TOP ORNAMENT UNIT	[M]
50	RYQX0110	5CD CTRL BTN ASS'Y	[M]
51	SHE187-5J	PCB SUPPORT	[M]
52	XTB3+10JFZ	SCREW	[M]
53	XTB3+20J	SCREW	[M]
54	XTBS26+10J	SCREW	[M]
55	XTBS3+8JFZ1	SCREW	[M]
56	XTW3+15T	SCREW	[M]
57	XTW3+8T	SCREW	[M]

24.4. Electrical Parts List

Ref. No.	Part No.	Part Name & Description	Remarks
		PRINTED CIRCUIT BOARD	
	REP3406B-N	DVD MODULE (1) P.C.B. (COMPONENT SIDE)	[M] (RTL)
	REP3406B-N	DVD MODULE (1) P.C.B. (FOIL SIDE)	[M] (RTL)
	REP3587H	DVD MODULE (2) P.C.B. (SIDE: A)	[M] (RTL)
	REP3587H	DVD MODULE (2) P.C.B. (SIDE: B)	[M] (RTL)
	REPX0376K	MAIN P.C.B.	[M] (RTL)
	REPX0376K	TUNER EXTENT P.C.B.	[M] (RTL)
	REPX0378Q	LED P.C.B.	[M] (RTL)
	REPX0378Q	TACT P.C.B.	[M] (RTL)
	REPX0378Q	PANEL P.C.B.	[M] (RTL)
	REPX0373B	TUNER P.C.B.	[M] (RTL)
	REPX0331A	DECK P.C.B.	[M] (RTL)
	REPX0321B	DECK MECHANISM P.C.B.	[M] (RTL)
	REPX0377G	POWER SUPPLY P.C.B.	[M] (RTL)
	REPX0377G	POWER P.C.B.	[M] (RTL)
	REPX0379D	TRANSFORMER P.C.B.	[M] (RTL)
	REPX0379D	AC INLET P.C.B.	[M] (RTL)
	REP2578A-N	CD OADING P.C.B.	[M] (RTL)
	REP2578A-N	CD DETECT P.C.B.	[M] (RTL)
	REP2578A-N	SPINDLE POSITION P.C.B.	[M] (RTL)
		INTEGRATED CIRCUITS	
IC1	C0GAM0000005	IC MOTOR DRIVE	[M]
IC2	C0CBADG00005	IC 5V REGULATOR	[M]
IC3	C0DBAMH00009	IC POWER SUPPLY	[M]
IC4	C0DBAMH00009	IC POWER SUPPLY	[M]
IC5	C0DBZHE00017	IC POWER SUPPLY	[M]
IC6	C0CBADG00005	IC 5V REGUCATOR	[M]
IC8	C0DBCFCG00004	IC 1.5V REGULATOR	[M]
IC9	C0CBADG00005	IC 5V REGUCATOR	[M]
IC50	C9ZB00000377	IC VIDEO BUFFER	[M]
IC101	LA1833NMNTLM	IC IF & MPX (TUNER)	[M]
IC102	LC72131MDTRM	IC PLL IC (TUNER)	[M]

Ref. No.	Part No.	Part Name & Description	Remarks
IC301	C0JZAS0000004	IC ANALOG SWITCH	[M]
IC302	KIA4558FEL	IC DUAL OP-AMP	[M]
IC306	KIA4558FEL	IC DUAL OP-AMP	[M]
IC307	C1BB00000782	IC 6 CHANNEL VOLUME	[M]
IC308	C0AABB000117	IC OP-AMP	[M]
IC500	RSN312H24-P	IC POWER HIC	[M]
IC501	C5BA00000113	IC VOLTAGE REGULATOR	[M]
IC600	C2BBHF000077	IC MICROPROCESSOR	[M]
IC601	C1BB00000574	IC I/O EXPANDER	[M]
IC603	C1BB00000086	IC SPECTRUM ANALYZER	[M]
IC604	C1BB00000574	IC I/O EXPANDER	[M]
IC700	C2HBZC000013	IC DSP	[M]
IC701	M62456FPE1	IC DIGITAL SOUND CONTROLLER	[M]
IC702	C1BB00000801	IC KARAOKE	[M]
IC703	C1BB00000574	IC I/O EXPANDER	[M]
IC951	CNB13030R2AU	IC PHOTO INTERRUPTER	[M]
IC971	CNB13030R2AU	IC PHOTO INTERRUPTER	[M]
IC1001	AN7348S-E1	IC P.B EQ/REC AMP/ ALC/TPS AMP	[M]
IC1004	C1AA00000612	IC R/P SELECT	[M]
IC2501	C0GBG0000033	IC MOTOR DRIVE	[M]
IC3001	MN2DS0002AP1	IC AV DECODER	[M]
IC3051	C3ABPJ000017	IC 64M SDRAM	[M]
IC4201	C0FBK0000035	IC 2CH D/A CONVERTER	[M]
IC6201	C0EBE0000070	IC RESET	[M]
IC6251	C0CBCBE00003	IC REGULATOR	[M]
IC6261	C0JBAA000001	IC INVERTER	[M]
IC6262	C0JBAA000001	IC INVERTER	[M]
IC6301	RFKPMV71W160	IC 16M FLASH	[SPC]
IC6561	C1DB00000980	IC CLOCK GENERATOR	[M]
